Deconstructing the Welfare State Paula Hyde, Edward Granter, John Hassard, Leo McCann, 2016-06-23

Who are NHS middle managers What do they do and why and how do they do it This book explores the daily realities of working life for middle managers in the UK's National Health Service during a time of radical change and disruption to the entire edifice of publicly funded healthcare It is an empirical critique of the movement towards a healthcare model based around HMO type providers such as Kaiser Permanente and United Health Although this model is well known internationally many believe it to be financially and ethically questionable and often far from best practice when it comes to patient care Drawing on immersive ethnographic research based on four case studies an Acute Hospital Trust an Ambulance Trust a Mental Health Trust and a Primary Care Trust this book provides an in depth critical appraisal of the everyday experiences of a range of managers working in the NHS It describes exactly what NHS managers do and explains how their roles are changing and the types of challenges they face The analysis explains how many NHS junior and middle managers are themselves clinicians to some extent with hybrid roles as simultaneously nurse and manager midwife and manager or paramedic and manager While commonly working in back office functions NHS middle managers are also just as likely to be working very close to or actually on the front lines of patient care Despite the problems they regularly face from

organizational restructuring cost control and demands for accountability the authors demonstrate that NHS managers in their various guises play critical yet undervalued institutional roles Depicting the darker sides of organizational change this text is a sociological exploration of the daily struggle for work dignity of a complex widely denigrated and largely misunderstood group of public servants trying to do their best under extremely trying circumstances It is essential reading for academics students and practitioners interested in health management and policy organisational change public sector management and the NHS more broadly

Medicine at the Margins Christopher Prener,2022-12-06 Presents a unique view of social problems and conflicts over urban space from the cab of an ambulance While we imagine ambulances as a site for critical care the reality is far more complicated Social problems like homelessness substance abuse and the health consequences of poverty are encountered every day by Emergency Medical Services EMS workers Written from the lens of a sociologist who speaks with the fluency of a former Emergency Medical Technician EMT **Medicine at the Margins** delves deeply into the world of EMTs and paramedics in American cities an understudied element of our health care system Like the public hospital the EMS system is a key but misunderstood part of our system of last resort **Medicine at the Margins** presents a unique prism through which urban social problems the health care system and the struggling social safety net refract and intersect in largely unseen ways Author Christopher Prener examines the forms of marginality that capture the reality of urban EMS work and showcases the unique view EMS providers have of American urban life The rise of neighborhood stigma and the consequences it holds for patients who are assumed by providers to be malingering is critical for understanding not just the phenomenon of non or sub acute patient calls but also why they matter for all patients This sense of marginality is a defining feature of the experience of EMS work and is a statement about the patient population whom urban EMS providers care for daily Prener argues that the pre hospital health care system needs to embrace its role in the social safety net and how EMSs future is in community practice of paramedicine a port of a broader mandate of pre hospital health care By leaning into this work EMS providers are uniquely positioned to deliver on the promise of community medicine At a time when we are considering how to rely less on policing the EMS system is already

tasked with treating many of the social problems we think would benefit from less involvement with law involvement
Medicine at the Margins underscores why the EMS system is so necessary and the ways in which it can be expanded

Thinking in an Emergency (Norton Global Ethics Series) Elaine Scarry, 2012-04-09 Award winning critic Elaine Scarry provides a vital new assessment of leadership during crisis that ensures the protection of democratic values In Thinking in an Emergency Elaine Scarry lays bare the realities of emergency politics and emphasizes what she sees as the ultimate ethical concern equality of survival She reveals how regular citizens can reclaim the power to protect one another and our democratic principles Government leaders sometimes argue that the need for swift national action means there is no time for the population to think deliberate or debate But Scarry shows that clear thinking and rapid action are not in opposition Examining regions as diverse as Japan Switzerland Ethiopia and Canada Scarry identifies forms of emergency assistance that represent thinking at its most rigorous and remarkable She draws on the work of philosophers scientists and artists to remind us of our ability to assist one another whether we are called upon to perform acts of rescue as individuals as members of a neighborhood or as citizens of a country

Inside Organizations David Gellner, Eric Hirsch, 2020-05-26 Most of us work in or for one but there are surprisingly few sustained analyses of the problems and peculiarities of organizations Anthropologists are increasingly turning their attention to the study of western organizations and this timely collection addresses the pleasures and pitfalls of ethnographic research undertaken across a range of organizational contexts From museums to laboratories health clinics and multinational businesses leading anthropologists discuss their fieldwork experiences the problems they encountered and the solutions they came up with This book highlights the practical political and ethical dimensions of research in organizations Among issues vividly described are the relations between gender and politics in organizational hierarchies How are sexual politics played out and experienced in health clinics How does a business manager's personal biography affect the relationships within the organization as a whole How are language and metaphor used to refigure the way people think about and act in organizations Institutions often have well defined procedures for bringing in visitors and guests When is the anthropologist an insider to the organization and when an outsider What ethical issues arise when researchers are caught between observing organizations and participating in their work In answering these and other questions the authors consider both the current status and future prospects for organizational ethnography Comprehensive and varied the book represents an invaluable aid to anyone interested in the politics and complexities of working life

Research Design Catherine Hakim, 2012-11-12 Providing a practical overview for graduates and professional researchers this book highlights the central issues involved in the design of medium to large scale social and economic research Covering both theoretical and policy research Hakim sets out the key features strengths and limitations of eight main types of study with illustrations from real life research of the kinds of questions each can best be used to answer This book also offers a more general pragmatic discussion of strategies for choosing between one design and another and on

how different types of study can be successfully combined in wider ranging research programmes In this expanded second edition the author has added new material on areas of contemporary significance across the social and economic sciences New features to this edition are a chapter on cross national comparative studies more examples throughout the text of comparative research both within Europe and across modern societies discussions of student theses advocacy research selection effects and collaboration

American Studies Jack Salzman, American Studies Association, 1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988

Bandage, Sort, and Hustle Josh Seim, 2020-02-04 What is the role of the ambulance in the American city The prevailing narrative provides a rather simple answer saving and transporting the critically ill and injured This is not an incorrect description but it is incomplete Drawing on field observations medical records and his own experience as a novice emergency medical technician sociologist Josh Seim reimagines paramedicine as a frontline institution for governing urban suffering Bandage Sort and Hustle argues that the ambulance is part of a fragmented regime that is focused more on neutralizing hardships which are disproportionately carried by poor people and people of color than on eradicating the root causes of agony Whether by compressing lifeless chests on the streets or by transporting the publicly intoxicated into the hospital ambulance crews tend to handle suffering bodies near the bottom of the polarized metropolis Seim illustrates how this work puts crews in recurrent and sometimes tense contact with the emergency department nurses and police officers who share their clientele These street level relations however cannot be understood without considering the bureaucratic and capitalistic forces that control and coordinate ambulance labor from above Beyond the ambulance this book motivates a labor centric model for understanding the frontline governance of down and out populations

Different by Design Mary Haywood Metz, 2003-08 Back in print for use in your courses this classic text features a new introduction by the author that situates the book in the context of present day educational debates This historic study analyzes the organizational and political pressures that combined to make three magnet schools distinctive social environments a rare glimpse at the critical processes with which teachers and students in both regular schools and schools of choice must constantly struggle In her new introduction Metz discusses many of today's hot topics including school choice curricular reform and school equity She also looks at what has transpired in the school district and the schools since her study was first published two decades ago The depth of detail in these case studies along with the clear and systematic discussion of each school in terms of the theoretical framework provided by the author make this a sought after textbook for educational policy and school organization courses

Brute Force Arnold Arluke, 2007 Brute Force looks at people having the most contact with everyday animal abuse humane law enforcement officers who are charged with enforcing anti cruelty statutes The author spent one year studying 30 animal cops and dispatchers in two large cities They see themselves as a power for the helpless a voice for the mute On the job experience changes this view Rather than fighting the good fight against egregious cases of cruelty they are overwhelmed with complaints that are ambiguous and must be stretched to qualify as legally defined abuse or with complaints of barking dogs or thin pets that are used in interpersonal disputes to get neighbors or spouses into trouble Even more discouraging to officers are clear cut and extreme cases of cruelty that do not lead to guilty verdicts or stiff penalties in court Resulting cynicism is aggravated when rookies realize that they are seen as second rate wannabe cops or closet animal extremists With little legitimate authority to enforce the law animal cops become humane educators who try to make people into responsible pet owners
