DeMint,David J. Woodard,2007-12-06 Americans today live in the greatest nation the world has ever known Never before has a country been the producer and beneficiary of so much wealth and freedom But with great success comes even greater responsibility Part of the American legacy is to pass our values to our posterity as well as to future generations in other nations To meet this responsibility the next generation must understand what made America great what is working what is not working and how to improve all the ideas that contributed to past success No factor is more important in this task than our freedom of speech This right is both a means and an end to improving and strengthening the nation Why We Whisper is about free speech in America but not freedom of speech as it is often defined today It is not the freedom to practice destructive behavior or to produce obscene material This book is about freedom of speech as it was intended by the visionaries who designed the Constitution and the Bill of Rights The First Amendment empowers Americans to join the public and political debate with their ideas and values including those traditional ideas and values that have made America great This fundamental freedom is under attack and unless principled Americans fight back our grandchildren and future generations around the world will receive a greatly diminished inheritance United States Senator Jim DeMint and Professor David Woodard compellingly demonstrate that through court rulings bureaucratic pronouncements and well intentioned but ultimately unhelpful laws secular values have allied with government authority to dismantle the ideals of a moral and decent nation A country once confident of its values and optimistic about its future is now pessimistic nervous and confused Traditional American institutions like the Boy Scouts churches businesses college campuses and public schools are routinely targeted for attack and government regulation As a result morally responsible patriotic Americans are      *Linda Goodman's*

In this pioneering work Guido Calabresi develops a framework for evaluating different systems of accident law. Defining the goal of accident law as the maximum reduction of accident and accident avoidance costs that can be achieved fairly, he examines ten political and economic choices implied in various approaches to reducing these costs. Calabresi then considers two fundamental problems all systems of accident law must face: who should be held responsible for accident costs and how should they be valued? He analyzes the fault insurance system now widely used and finds it wanting on grounds both of cost reduction objectives and fairness. In conclusion, he discusses recent proposals for reform of the law, points out questions they raise, and ends by indicating the two he thinks most likely to prevail and the fundamental conflict between them. Calabresi's book is most significant for its first-rate combination of modern economic analysis and legal policy. The methodology and underlying principles extend far beyond the particular subject matter of accident law to many other legal areas that could benefit from economic analysis. In turn, some economic analyses may become richer for the discussion in this book. It is truly one of those rare important volumes. Gerald M. Meier. *Forensic Medical Investigation of Motor Vehicle Incidents* Michael P. Burke, 2006-11-27 *Forensic Medical Investigation of Motor Vehicle Incidents* provides an in-depth study of the circumstances underlying motor vehicle incidents and allows for a reasoned analysis of a crash victim's injuries. It also sheds light on the development of similar adjusted measures to reduce traffic violations and/or accident fatalities and injuries and to promote road safety in other countries and regions. As such, it is a valuable resource for anyone wanting to understand the characteristics and patterns of road traffic safety, the risk factors affecting traffic violations and traffic injuries, as well as road safety policies and practices in China. **Proceedings of the ...
