Rupert The Fantastic Flamingo:

Rupert, the Fantastic Flamingo ,1988 Rupert uses what his parents Rex and Rose have taught him when he is blown miles from home by the fringes of a hurricane **Hurricanes** Paul V. Kislow,2008 A hurricane is a tropical storm with winds that have reached a constant speed of 74 miles per hour or more Hurricane winds blow in a large spiral around a relative calm centre known as the eye The eye is generally 20 to 30 miles wide and the storm may extend outward 400 miles As a hurricane approaches the skies will begin to darken and winds will grow in strength As a hurricane nears land it can bring torrential rains high winds and storm surges A single hurricane can last for more than 2 weeks over open waters and can run a path across the entire length of the eastern seaboard August and September are peak months during the hurricane season that lasts from 1 June to 30 November This book presents the facts and history of hurricanes The Literary Review ,1999
