Rural Aquaculture:

Rural Aquaculture Peter Edwards, David Little, Harvey Demaine, 2002 Aquaculture for both finfish and shellfish is expanding rapidly throughout the world. It is regarded as having the potential to provide a valuable source of protein in less developed countries and to be integrated into the farming systems and livelihoods of the rural poor. This book addresses key issues in aquaculture and rural development with case studies drawn from several countries in South and South East Asia. Papers included cover topics ranging from production and technical issues such as pond culture and rice field fisheries to social aspects and research and development methodology. The book has been developed from a meeting of the Asian Fisheries Society. It is aimed at all concerned with aquaculture and rural development. Rural Aquaculture Peter

Edwards, Harvey Demaine, 1997 An Evaluation of Small-scale Freshwater Rural Aquaculture Development for Poverty Reduction, 2005 This report looks at small scale aquaculture from the viewpoint of poverty reduction. What are the main factors that enable fish farming to generate livelihoods and reduce poverty? Based on case studies, the first part of the report highlights the importance of access to capital assets, human, social, natural, physical and financial, and to a range of transforming processes such as markets, institutions, facilities, infrastructure and services. **Report of the Ad Hoc**

Working Group of Experts in Rural Aquaculture Asia-Pacific Fishery Commission. Ad Hoc Working Group of Experts in Rural Aquaculture, 1999-01-01 Rural Aquaculture Bruno Augusto Amato Borges, 2019-11 Rural Aquaculture is a book introducing the concept of rural aquaculture. This book focuses on the integration of the rural aquaculture with the agriculture and the production systems which are used in rural aquaculture. It aims to provide information about the concepts and approaches of aquaculture technologies and business planning and management for small scale sustainable aquaculture. The impact of rural aquaculture on the livelihood and food security and the application of biotechnology has also been mentioned in the second half of this book. The insights about the social and economic aspects of rural aquaculture issues and opportunities and the future aspects in rural aquaculture have been provided to the readers with the help of this book.

Report of the Expert Consultation on Small-Scale Rural Aquaculture, Rome, Italy, 28-31 May 1996 Manuel Martínez-Espinosa, 1997-01-01 The objective of the Consultation was to provide FAO and its members with information and advice on the role of small scale aquaculture in rural development. To this end, participants were asked to analyze and reflect on four keynote papers prepared by selected participants. In addition, four information papers were presented and discussed. This document presents a summary of discussions and principal conclusions reached, followed by abstracts and full versions of the overview and thematic papers plus the abstracts of the information papers. Strategic Management of Wastewater from Intensive Rural Industries Nurudeen Abiola Oladoja, Emmanuel Iyayi Unuabonah, 2025-08-22 This book provides insight into the environmental and ecological impacts of the operations of intensive rural industries and how these undesirable impacts can be effectively managed. In the developing economies, the different human empowerment and poverty alleviation

schemes have produced myriads of intensive rural industries that littered States in these economies These industries are often characterized by their small scale outmoded technology obsolete equipment poor management and large water consumption Since their operations usually consume large volume of fresh water high magnitude of untreated wastewater is equally discharged The huge consumption of freshwater puts a lot of stress on freshwater resource available for human use and the discharge of contaminated wastewater from these industries disrupts the ecological balance It has been reported that untreated industrial waste constitutes about two thirds of the total waste discharge into water bodies and the largest chunk of this is derived from rural enterprises Therefore the environmental cost of rural industrialization is enormous and needs to be examined The evaluation of the quality characteristics the socioeconomic impacts and the law guiding the generation and the discharge of the wastewater from specific rural industries are enunciated The conventional practice and the trends in the effective management of specific wastewater samples are also discussed

This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc

International Research on Natural Resource Management Hermann Waibel,David Zilberman,2007-01-01 Over the past two decades significant investment has been made into agriculture related natural resource management research in developing countries This collection of case studies establishes a methodological foundation for impact assessments of NRMR through a discussion of research conducted by the CGIAR around the world
