So, Nan Lin, Dudley Poston, 2001-07-30 The Chinese triangle of mainland China Hong Kong and Taiwan constitutes one of the most dynamic regions in the world economy Since the late 1970s these three societies have experienced increasing economic integration however studies aimed at analyzing and explaining this integration have often overlooked the very important role social institutions have played in the shaping of this process To fill this gap this book adopts a systematic institutional approach designed to examine the different patterns of institutions in the three countries and to discuss how such social institutions as the economy gender social networks and the Chinese diaspora have exerted a profound impact on all three societies The chapters taken together argue that different patterns of institutional configuration have led to divergent paths of development and that this divergence will have significant implications on the prospects for Chinese national reunification in the twenty first century The Introductory chapter provides a historical discussion on the origins and the transformation of the Chinese triangle during the second half of the twentieth century The remainder of the volume is broken into four topics considered crucial for understanding the transformation of the Chinese triangle economic transformation gender social networks and the Chinese diaspora As globalization impacts the Chinese triangle studies that consider the issues from the perspective of social institutions will be increasingly important to understanding the area as it develops in the world economy *Rural Development in Asia, Hearings Before the Subcommittee on Asian and Pacific Affairs...* United States. Taiwan's Impact on China Steve Tsang, 2017-01-24 This book is about the basis and scope of impact that Taiwan a democracy with a population of around 23 million has on China the most powerful remaining Leninist state which claims sovereignty over Taiwan and has a population of over 1.3 billion It examines how Taiwan has helped China in its economic transformation but argues that the former exercises greatest influence through its soft power The expert and timely contributions in this book demonstrate how Taiwan exerts real influence in China through admiration of its popular culture be it in music or literature as well as its reach into politics and economics As mainland Chinese visit Taiwan they are most impressed with civility in everyday living based on a modernized version of the traditional Chinese culture However discussions in the book also reveal the limits of Taiwan's impact as the Chinese government tightly controls the narrative about Taiwan and does not tolerate any Taiwanese posing a threat to its monopoly of power

The Social History of Agriculture Christopher Isett,Stephen Miller,2016-11-09 This innovative text provides a compelling narrative world history through the lens of food and farmers Tracing the history of agriculture from earliest times to the present Christopher Isett and Stephen Miller argue that people rather than markets have been the primary agents of agricultural change Exploring the actions taken by individuals and groups over time and analyzing their activities in the wider contexts of markets states wars the environment population increase and similar factors the authors emphasize how larger social and political forces inform decisions and lead to different technological outcomes Both farmers and elites responded in ways that impeded economic development Farmers when able to trade with towns used the revenue to gain more land and security Elites used commercial opportunities to accumulate military power and slaves The book explores these tendencies through rich case studies of ancient China precolonial South America early modern France England and Japan New World slavery colonial Taiwan socialist Cuba and many other periods and places Readers will understand how the promises and problems of contemporary agriculture are not simply technologically derived but are the outcomes of decisions and choices people have made and continue to make

Face Off John W. Garver, 2011-10-01 Taiwan's first presidential election in 1996 sparked a Sino U S military showdown that resulted in the biggest show of U S naval force in East Asia since the Vietnam War This book is the first to explore the origins and triangular dynamics of that historic confrontation Analyzing the key decisions and misperceptions that led to the Taiwan Strait crisis Garver warns that it may usher in a more confrontational era of Sino U S relations China is already emerging as an economic powerhouse and fears of its becoming an expansionist military power have grown in recent years as China has rapidly built up its armed forces since 1989 It has also adopted a more assertive stance in several territorial disputes with its neighbors arousing new security concerns for Asia as a whole When China tried to intimidate Taiwan's voters by firing missiles and conducting large scale military exercises off its coasts in the period preceding the 1996 election the U S dispatched two aircraft carrier battle groups to Taiwan The prestige of all sides was fully engaged as powerful domestic interests demanded an assertive posture Eventually China adopted a more cautious stance and the crisis passed But it marked the first instance of Chinese nuclear coercion of the U S and gave the China threat new credence in the U S and elsewhere in Asia The author has studied the Taiwan question for more than 30 years and has witnessed first hand the growth and culmination of Taiwan's democratization This sober mature reflection of decades of thought is certain to inform the debate on the China threat and the future of Sino U S relations
