Rural Economy and Country Life in the Medieval West Georges Duby, 1998-01-29 One of the most important imaginative solidly documented well written books of medieval history that I have ever read It offers a unique combination of synthetic power and analytic perception of bold judgment and Cartesian doubt of hard economic facts and subtle psychological considerations

Rural Economy and Country Life in the Medieval West Georges Duby, 1976 *Rural Economy and Country Life in the Medieval West* Georges Duby, 1981 *Rural Economy and Country Life in the Medieval West. Translated by Cynthia Postan* Georges Duby, 1968 **Viator** University of California, Los Angeles. Center for Medieval and Renaissance Studies, *The Modernization of the Western World* John McGrath, Kathleen Callanan Martin, 2024-08-01 Covering Western history from the ancient world to the current era of globalization The Modernization of the Western World describes the forces of social change and what they have meant to the lives of the people caught up in them The volume presents the history of Western civilization from a historical sociology perspective introducing readers to the analyses of thinkers like mile Durkheim Karl Marx Adam Smith Ferdinand T nnies and Max Weber in order to provide tools for understanding how societies function and change This application of modernization theory argues not that what has happened in the West should or even must happen in non Western societies but that understanding modernization as a process of social change affords a better understanding of why and how life has changed over the past millennium The interactions of Western and non Western societies have had a profound effect on each other this is the story of the development of a truly global economy This new edition has been updated to include a final chapter which addresses recent developments economic disturbances in the global marketplace cyberwarfare and the rise of populist movements testing the relevance of classic modernization theory for today Featuring a glossary maps and illustrations boxed features and an extensive index this book will be of particular interest to students looking to understand world history as well as those interested in historical sociology and modernization theory

Moore, 2025-08-19 Integrating both social and historical factors this radical analysis of the development of capitalism reveals the ever deepening relationship between capital and ecology Finance Climate Food Work How are the crises of the twenty first century connected In *Capitalism in the Web of Life* Jason W Moore argues that the sources of today's global turbulence have a common cause capitalism as a way of organizing nature including human nature Drawing on environmentalist feminist and Marxist thought Moore offers a groundbreaking new synthesis capitalism as a world ecology of wealth power and nature Capitalism's greatest strength and the source of its problems is its capacity to create Cheap Nature's labor food energy and

raw materials That capacity is now in question Rethinking capitalism through the pulsing and renewing dialectic of humanity in nature Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis Capitalism in the Web of Life shows how the critique of capitalism in nature rather than capitalism and nature is key to understanding our predicament and to pursuing the politics of liberation in the century ahead

Structures and Assertions Thomas Allan Brady, Heiko Augustinus Oberman, James D. Tracy, 1993-12-31 Vol 1

Renaissance Syntax and Subjectivity John C. Leeds, 2017-03-02 The relationship between Latin and the Scots vernacular in the chronicle literature of 16th century Scotland provides the topic for this study John Leeds here shows how the disposition of grammatical subjects in the radically dissimilar syntactic systems of humanist neo Latin and Scots conditions the way in which the subject i e the human individual and its actions are conceived in the writing of history In doing so he extends the boundaries of existing critical literature on early modern subjectivity to include the subject of grammar analyzing its incorporation into narrative sentences and illuminating the ideological contents of different systems for its deployment Though focused on the chronicles of Renaissance Scotland the argument can in principle be applied to the entire range of Latin vernacular relations during the early modern period While examining the intellectual culture of early modernity Leeds also takes aim at every stage of his argument at the semiotic and social constructionist orthodoxies that dominate the humanities today Against the notion that human subjects are discursive constructs he argues for the subordination of discourse to realities both material and immaterial that are external to language As part of this argument he proposes a view of neo Latin humanism as a resistance to the onset of modernity arguing that Latin prose provides options at

once syntactic ideological and ontological that vernacular culture has to its considerable detriment foreclosed In sum Leeds advocates a renewed and theoretically informed commitment to the humanism that the humanities themselves have been at such pains during the last scholarly generation to depreciate
