Calendar London School of Economics and Political Science,1905 **The English Parliaments of Henry VII 1485-1504** P. R. Cavill,2009-08-13 P R Cavill offers a major reinterpretation of early Tudor constitutional history In the grand Whig tradition the parliaments of Henry VII were a disappointing retreat from the onward march towards parliamentary democracy The king was at best indifferent and at worst hostile to parliament its meetings were cowed and quiescent subservient to the royal will Yet little research has tested these assumptions Drawing on extensive archival research Cavill challenges existing accounts and revises our understanding of the period Neither to the king nor to his subjects did parliament appear to be a waning institution fading before the waxing power of the crown For a ruler in Henry's vulnerable position parliament helped to restore royal authority by securing the good governance that legitimated his regime For his subjects parliament served as a medium through which to communicate with the government and to shape and on occasion criticize its policies Because of the demands parliament made its impact was felt throughout the kingdom among ordinary people as well as among the elite Cooperation between subjects and the crown rather than conflict characterized these parliaments While for many scholars parliament did not truly come of age until the 1530s when freed from its medieval shackles the modern institution came to embody the sovereign nation state in this study Henry's reign emerges as a constitutionally innovative period Ideas of parliamentary sovereignty were already beginning to be articulated It was here that the foundations of the Tudor revolution in government were being laid **The Place of the Social Margins, 1350-1750** Andrew Spicer,Jane L. Stevens Crawshaw,2016-08-12 This interdisciplinary volume illuminates the shadowy history of the disadvantaged sick and those who did not conform to the accepted norms of society It explores how marginal identity was formed perceived and represented in Britain and Europe during the medieval and early modern periods It

illustrates that the identities of marginal groups were shaped by their place within primarily urban communities both in terms of their socio economic status and the spaces in which they lived and worked Some of these groups such as executioners prostitutes pedlars and slaves performed a significant social and economic function but on the basis of this were stigmatized by other townspeople Language was used to control and limit the activities of others within society such as single women and foreigners as well as the victims of sexual crimes For many such as lepers and the disabled marginal status could be ambiguous cyclical or short lived and affected by key religious political and economic events Traditional histories have often considered these groups in isolation Based on new research a series of case studies from Britain and across Europe illustrate and provide important insights into the problems faced by these marginal groups and the ways in which medieval and early modern communities were shaped and developed

Peasants Making History Christopher Dyer,2022-06-02
Peasants have been despised underrated or disregarded in the past Historians and archaeologists are now giving them a more positive assessment and in *Peasants Making History* Christopher Dyer sets a new agenda for this kind of study Using as his example the peasants of the west midlands of England Dyer examines peasant society in relation to their social superiors their lords their neighbours and their households and finds them making decisions and taking options to improve their lives In their management of farming both cultivation of fields and keeping of livestock they made a series of modifications and some dramatic changes not just reacting to shifts in circumstances but also devising creative initiatives Peasants played an active role in the development of towns both by migrating into urban settings but also by trading actively in urban markets Industry in the countryside was not imposed on the rural population but often the result of peasant enterprise and flexibility If we examine peasant attitudes and mentalities we find them engaging in political life making a major contribution to religion recognizing the need to conserve the environment and balancing the interests of individuals with those of the communities in which they lived Many features of our world have medieval roots and peasants played an important part in the development of the rural landscape participation of ordinary people in government parish church buildings towns and social welfare The evidence to support this peasant centred view has to be recovered by imaginative interpretation and by using every type of source including the testimony of archaeology and landscape

Identifying the English Edward Higgs,2011-10-06
Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied *Identifying the English* looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and

commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security
