## **Rural Development In Eurasia And The Middle East:**

**Rural Development in Eurasia and the Middle East** Kurt Engelmann, Vjeran Pavlaković, 2001 The ties that bind Central Asia to the Middle East have increased dramatically in recent years as political emancipation from Soviet rule has spurred the restoration of material culture shared by Turkic and Iranian peoples Political institutions and farming practices however are still based on the Soviet model with centralised large scale agricultural production serving Russian rather than local needs The contributors to this volume examine land reform and agricultural development in Russia Central Asia North Africa and the Middle East Their studies bring into question the evolutionary view of agricultural development from small scale subsistence to large scale commercialised agricultural systems and emphasise the need to understand the specific political historical and geographic contexts of rural development and land reform This volume is a must for regional specialists historians economists and those working on rural development issues throughout Eurasia [Rural Development in Eurasia and the Middle East](#) Kurt Engelmann, 2016-04-18 Rural Development in Eurasia and the Middle East Land Reform Demographic Change and Environmental Constraints *Geography in America at the Dawn of the 21st Century* Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White [Lineages of Revolt](#) Adam Hanieh, 2013-10-14 While the outcomes of the tumultuous uprisings that continue to transfix the Arab world remain uncertain the root causes of rebellion persist Drawing upon extensive empirical research Lineages of Revolt tracks the major shifts in the region's political economy over recent decades In this illuminating and original work Adam Hanieh explores the contours of neoliberal policies dynamics of class and state formation imperialism and the nature of regional accumulation the significance of Palestine and the Gulf Arab states and the ramifications of the global economic crisis By mapping the complex and contested nature of capitalism in the Middle East the book demonstrates that a full understanding of the uprisings needs to go beyond a simple focus on dictators and democracy **The Economics of Abundance** Wolfgang Hoeschele, 2016-03-23 No matter how many resources we consume we never seem to have enough The Economics of Abundance is a balanced book in which Wolfgang Hoeschele challenges why this is so He claims that our current capitalist economy can exist only on the basis of

manufactured scarcity created by scarcity generating institutions and these institutions manipulate both demand and supply of commodities Therefore demand consistently exceeds supply and profits and economic growth can continue at the cost of individual freedom social equity and ecological sustainability The fact that continual increases in demand are so vital to our economy leads to an impasse many people see no alternative to the generation of ever more demand but at the same time recognize that it is clearly unsustainable ecologically and socially So can demand only be reduced by curtailing freedom and is this acceptable This book argues that by analyzing how scarcity generating institutions work and then reforming or dismantling them we can enhance individual freedom and support entrepreneurial initiative and at the same time make progress toward social justice and environmental sustainability by reducing demands on vital resources This vision would enable activists in many fields social justice civil liberties and environmental protection as well as many entrepreneurs and other members of civil society to work together much more effectively make it more difficult to portray all these groups as contradictory special interests and thereby help generate momentum for positive change Meanwhile for academics in many fields of study the concept of the creation of scarcity or abundance may be a highly useful analytical tool

**Politics, Identity and Education in Central Asia** Pınar Akçalı,Cennet Engin-Demir,2013 Focusing on the areas of politics identity and education this book looks at some of the most pressing and challenging issues that Kyrgyzstan faces in the post Soviet era It argues that Kyrgyzstan is challenged with oscillations between the old and the new on the one hand and domestic and international on the other The book analyses the process of post Soviet transition in today s Kyrgyzstan by focusing on the political elites some of the major identity problems and educational issues It discusses how Kyrgyzstan s first president in the post Soviet era had already been an exceptional

leader even prior to the collapse of the Soviet Union in terms of his democratic and liberal tendencies The book goes on to look at how identity is a major factor in the country shaped to a large extent by genealogical factors and patron client mechanisms on the one hand and religious considerations on the other Finally it highlights how education has been perceived as a very influential agent of socialization that develops not only literacy and other skills but also common attitudes and values that are considered essential to any society By evaluating these three areas the book argues that Kyrgyzstan cannot isolate itself from the demands priorities and pressures of international actors which sometimes are in conflict with the country s domestic conditions It is of interest to students and scholars of Asian Studies Politics and International Relations
