

RURality BITES

Current agricultural and rural policy in Australia, among governments and major industry groups alike, 'is a recipe for continued rural decline and the increasing dominance of agriculture by global agri-business. Indeed, so is a threat to the past.'

RURality BITES is the first comprehensive book on the social and environmental transformation sweeping rural Australia at the beginning of the 21st century.

RURality BITES proposes that the destiny of the future in rural Australia is an increasingly knowledge intensive one and the concerns, issues and identities of those Australians must be addressed if a positive future is to be realised. In this book it is apparent that the seeds of a new approach – one that acknowledges the increasingly globalised context for all activity, but also looks social and natural capital locally – have already been sown. The issue now is to nurture them and ensure that they allow for new enterprises, forms of knowledge, types of community service and forms of governance to develop, and evolve, in the face of ever shifting circumstances.

Recent books have taken Australia rural and environmental knowledge and research seriously and provided the nation's institutions for cultural research, management, teaching and learning a critical and critical function.

The book is a comprehensive overview of the history of the rural and environmental issues in Australia. It is a must read for anyone interested in the rural and environmental issues in Australia. It is a must read for anyone interested in the rural and environmental issues in Australia.

a view to enhancing industry sustainability **The Rural Efficiency Guide** ,1918 *Rural Victims of Crime* Rachel Hale,Alistair Harkness,2022-12-30 *Rural Victims of Crime* offers a pioneering sustained assessment of the rural victim It does so by examining and analysing the conceptual constructs of a victim and challenging the urban bias of victimisation and victimology in criminological study Indeed far too much criminological scholarship is based on the false assumption that rural areas are relatively crime free and thus free too of victims Providing international perspectives chapters in this edited collection focus centrally on notions of place and space and constructions of rural victims in a variety of contexts exploring the impact that geographic location has on the type and prevalence of victimisation The concept of victimisation is often considered in terms of interpersonal relationships between humans neglecting the potent impact of victimisation of non humans and the natural and built environment *Rural Victims of Crime* discusses existing notions of victimology in relation to non human subjects broadening conceptualisations of the victim and associated impacts resulting from victimisation Structured in three parts *Rural Victims of Crime* conceptualises the rural victim enhances understanding of the realities of rural victimisation and considers both formal and informal responses to rural victimisation Chapters are accompanied by practical contemporary case studies to connect theory with praxis This book is an essential and valuable resource for academics students and practitioners alike in the fields of criminology criminal justice rural studies victimology geography sociology and spatiality *Crime and Safety in the Rural* Vania Ceccato,Jonatan Abraham,2022-06-22 Criminology has until recently neglected the nature and levels of crime outside the urban realm This is not a surprise as crime tends to concentrate in urban areas and the police directs resources where the problems are Yet there are many reasons why scholars decision makers and society as a whole should care about crime and safety in rural areas This book highlights 20 reasons why crime and safety in rural areas is a topic of relevance We attempt to untangle currently simplistic views of the rural by discussing a number of facets of the countryside as both safe and criminogenic and more importantly a hybrid place worth to be examined in its own right We adopt the notion of a rural urban continuum that captures the nuances of places of varied nature spanning from remote and desolate spaces to accessible and connected environments of the urban fringe Areas on the rural urban continuum may be in constant transformation given local and global influences which imposes challenges for policing and long term social sustainability Then the book critically reviews a rich body of English language literature in rural criminology that extends over more than four decades a scholarship that has engaged researchers and practitioners in all continents The books finishes with a discussion of the emergent research questions of the field and offers implications for practice and the 2030 Sustainable Development Goals *The Rural* Richard Munton,2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of

the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts

Sustainability and Change in Rural Australia Chris Cocklin, Jacqui Dibden, 2005 By addressing themes such as social and economic change government policy and gender relations this volume tackles the thematic complexities of sustainability It attempts to understand how small rural communities have survived in the past what factors shaped them and how these factors will impact on their future survival

Tracking Rural Change Francesca Merlan, David Raftery, 2009-04-01 A key intensifying change affecting rural areas in the last few decades has been a decline in the proportion of national populations whose principal livelihood is farming The corresponding re distribution of population has typically resulted in a net population loss to rural areas and diversification of rural activity The corporatization and technological modification of food production has prompted new policy challenges and has bound rural and urban populations together in new relationships articulated in moral discourses of custodianship food safety and sustainability Contributors to this volume came together in the attempt to stimulate collective insight into trends of rural change in Australia New Zealand and Europe The first two countries have been characterised by avowedly neoliberal rural policy with considerable departures from it in practice Europe on the other hand by a mix of policy measures which attempt to integrate land management and sustainability diversification and maintenance of a competitive farming sector within an overarching policy framework more overtly though only partially oriented towards sustaining rural society Aiming to build on research relating to the character of rural transitions this volume offers substantive and critical contributions to

the understanding of the sources of unpredictability instability and continuity that underpin rural transition The papers explore changes and continuities in policy the governance of rural spaces technological developments relating to rural areas and populations and social forms of subjectivation and participation in increasingly diverse rural settings *Endurance* Deb Anderson,2014-11-05 *Endurance* presents stories of ordinary Australians grappling with extraordinary circumstances providing insight into their lives their experiences with drought and their perceptions of climate change The book opens with the physical impacts science politics and economics of drought and climate change in rural Australia It then highlights the cultural and historical dimensions taking us to the Mallee wheat belt where researcher Deb Anderson interviewed farm families from 2004 to 2007 as climate change awareness grew Each story is grouped into one of three themes Survival Uncertainty and Adaptation Illustrated with beautiful colour photographs from Museum Victoria *Endurance* will appeal to anyone with an interest in life stories rural Australia and the environment *Controversies in Environmental Sociology* Robert White,2004-10-18 This comprehensive textbook deals with the key issues and controversies in environmental sociology today Each chapter deals with discrete issues in a manner that captures the main debates the central figures and the social nature of environmental related trends The text reflects international developments in the area as well as drawing upon specific case examples and materials It includes contributions from leading experts in the field and is compiled by one of Australia s best known sociologists Professor Rob White Written in an accessible language with further reading lists for students at the end of each chapter *Controversies in Environmental Sociology* provides a timely introduction to the subject

The Cambridge Handbook of Social Sciences in Australia Ian McAllister,Steve Dowrick,Riaz Hassan,2003-08-07 First published in 2003 The Cambridge Handbook of Social Sciences in Australia is a high quality reference on significant research in Australian social sciences The book is divided into three main sections covering the central areas of the social sciences economics political science and sociology Each section examines the significant research in the field placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined taught and researched *Masculinity Beyond the Metropolis* J. Kenway,A. Kraack,A. Hickey-Moody,2006-06-20 This book gives insights on youth masculinity and place by exploring spatially marginalized masculinities in stigmatized and romanticized out of the way places in developed Western countries It shows the impact of globalization on place and identity through global ethnographic studies and media representations of young men in peripheral places **Redesigning Animal Agriculture** ,2007 Focusing on livestock production systems this text addresses how the diversity of global food demands will be met in future providing insights into scientific areas and the implications for addressing global drivers for change *Rural Crime and Community Safety* Vania A Ceccato,2015-08-27 Crime is often perceived as an urban issue rather than a problem that occurs in rural areas but how far is this view tenable This book explores the relationship between crime and community in rural areas and addresses the notion of safety as part of the

community dynamics in such areas Rural Crime and Community Safety makes a significant contribution to crime science and integrates a range of theories to understand patterns of crime and perceived safety in rural contexts Based on a wealth of original research Ceccato combines spatial methods with qualitative analysis to examine in detail farm and wildlife crime youth related crimes and gendered violence in rural settings Making the most of the expanding field of Criminology and of the growing professional inquiry into crime and crime prevention in rural areas rural development and the social sustainability of rural areas this book builds a bridge by connecting Criminology and Human Geography This book will be suitable for academics students and practitioners in the fields of criminology community safety rural studies rural development and gender studies
