Service Clubs In American Society Rotary Kiwanis And Lions:

Service Clubs in American Society Jeffrey A. Charles, 1993 Placing the clubs in the context of twentieth century middle class culture Charles maintains that they represented the response of locally oriented traditional middle class men to societal changes The groups emerged at a time when service was becoming both a middle class and a business ideal As voluntary associations they represented a shift in organizing rationale from fraternalism to service The clubs and their ideology of service were welcome as a unifying force at a time when small cities and towns were beset by economic and population pressures Membership in Service Clubs Divya Wodon, Naina Wodon, Quentin Wodon, 2014-04-04 Membership in Service Clubs provides the first rigorous assessment of the activities of Rotary a global service organization founded in 1905 that implements projects and helps build goodwill and peace throughout the world

God's Businessmen Sarah Ruth Hammond, 2017-11-20 The evangelical embrace of conservatism is a familiar feature of the contemporary political landscape What is less well known however is that the connection predates the Reagan revolution going all the way back to the Depression and World War II Evangelical businessmen at the time were quite active in opposing the New Deal on both theological and economic grounds and in doing so claimed a place alongside other conservatives in the public sphere Like previous generations of devout laymen they self consciously merged their religious and business lives financing and organizing evangelical causes with the kind of visionary pragmatism that they practiced in the boardroom In *God's Businessmen* Sarah Ruth Hammond explores not only these men's personal trajectories but also those of the service clubs and other institutions that like them believed that businessmen were God's instrument for the Christianization of the world Hammond presents a capacious portrait of the relationship between the evangelical business community and the New Deal and in doing so makes important contributions to American religious history business history and the history of the American state Everybody Else Sarah Potter, 2014 A comparative analysis of diverse postwar families and examines the lives and case records of those who applied to adopt or provide foster care in the 1940s and 1950s It considers an array of individuals both black and white middle and working class who found themselves on the margins of a social world that privileged family membership

Soldiers to Citizens Suzanne Mettler, 2007-09-10 Drawing on extensive interviews and surveys with hundreds of members of the greatest generation Suzanne Mettler finds that by treating veterans as first class citizens and in granting advanced education the G I Bill inspired them to become the active participants thanks to whom memberships in civic organizations soared and levels of political activity peaked

Food Nations Warren Belasco, Philip Scranton, 2014-06-03 This original collection abandons culinary nostalgia and the cataloguing of regional cuisines to examine the role of food and food marketing in constructing culture consumer behavior and national identity

The Transformation of American Politics Paul Pierson, Theda Skocpol, 2011-06-27 The contemporary American political landscape has been marked by two paradoxical transformations the emergence after 1960 of an increasingly activist state and the rise of an assertive and politically powerful conservatism that strongly opposes activist government Leading young scholars take up these issues in *The Transformation of American Politics* Arguing that even conservative administrations have become more deeply involved in managing our economy and social choices they examine why our political system nevertheless has grown divided as never before over the extent to which government should involve itself in our lives The contributors show how these two closely linked trends have influenced the reform and running of political institutions patterns of civic engagement and capacities for partisan mobilization and fueled ever heightening conflicts over the contours and reach of public policy These transformations not only redefined who participates in American politics and how they do so but altered the substance of political conflicts and the capacities of rival interests to succeed Representing both an important analysis of American politics and an innovative contribution to the study of long term political change this pioneering volume reveals how partisan discourse and the relationship between citizens and their government have been redrawn and complicated by increased government programs The contributors are Andrea Louise Campbell Jacob S Hacker Nolan McCarty Suzanne Mettler Paul Pierson Theda Skocpol Mark A Smith Steven M Teles and Julian E Zelizer

Handbook of Community Movements and Local Organizations Ram A. Cnaan, Carl Milofsky, 2007-12-18 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life

Social Inequality Kathryn Neckerman, 2004-06-18 Inequality in income earnings and wealth has risen dramatically in the United States over the past three decades Most research into this issue has focused on the causes global trade new technology and economic policy rather than the consequences of inequality In *Social Inequality* a group of the nation's leading social scientists opens a wide ranging inquiry into the social

implications of rising economic inequality Beginning with a critical evaluation of the existing research they assess whether the recent run up in economic inequality has been accompanied by rising inequality in social domains such as the quality of family and neighborhood life equal access to education and health care job satisfaction and political participation Marcia Meyers and colleagues find that many low income mothers cannot afford market based child care which contributes to inequality both at the present time by reducing maternal employment and family income and through the long term consequences of informal or low quality care on children s educational achievement At the other end of the educational spectrum Thomas Kane links the growing inequality in college attendance to rising tuition and cuts in financial aid Neil Fligstein and Taek Jin Shin show how both job security and job satisfaction have decreased for low wage workers compared with their higher paid counterparts Those who fall behind economically may also suffer diminished access to essential social resources like health care John Mullahy Stephanie Robert and Barbara Wolfe discuss why higher inequality may lead to poorer health wider inequality might mean increased stress related ailments for the poor and it might also be associated with public health care policies that favor the privileged On the political front Richard Freeman concludes that political participation has become more stratified as incomes have become more unequal Workers at the bottom of the income scale may simply be too hard pressed or too demoralized to care about political participation Social Inequality concludes with a comprehensive section on the methodological problems involved in disentangling the effects of inequality from other economic factors which will be of great benefit to future investigators While today s widening inequality may be a temporary episode the danger is that the current economic divisions may set in motion a self perpetuating cycle of social disadvantage The most comprehensive review of this quandary to date Social Inequality maps out a new agenda for research on inequality in America with important implications for public policy

Organized White Women and the Challenge of Racial Integration, 1945-1965 Helen Laville, 2017-02-20 This monograph asserts that the troubled history of segregation within American women s associations created a legacy of racial exclusivity and privilege While acknowledging the progressive potential of women s associations and the extent to which they created a legitimate outlet for American women s public activism it explores how and why such organizations failed to aid in issues of integration Rather than being a historical accident or a pragmatic response to circumstance this monograph demonstrates that white exclusivity and privilege was crucial to the authority and influence of these associations Organized White Women and the Challenge of Race Relations examines the translation of what seemed on the surface to be relatively simple demands for racial integration into a far more significant and all encompassing confrontation with the frequently hidden structures and practices of white privilege

Gendering Entrepreneurial Ecosystems Marit Breivik-Meyer, Marta Lindvert, Anne-Charlott Callerstig, Dag Balkmar, Gry Agnete Alsos, 2025-02-11 The increased interest in entrepreneurial ecosystems often builds on the underlying assumption that entrepreneurs have equal access to resources participation and support However women are

underrepresented in successful entrepreneurial ecosystems and a persistent gender bias continues to exist This bias is reflected in assumptions about the typical entrepreneur It is white American men that spring to mind portrayed as entrepreneurial superheroes associated with risk taking and big money That they are men is often taken for granted with successful female entrepreneurs seldom elevated in the same way This illustrates how entrepreneurship is gendered with implications for resource access and chances of success The entrepreneurial ecosystem is not a level playing field This book gives insights on how to remedy gendered challenges that pose problems not only for individuals but also for the entrepreneurial ecosystem By analysing ways of making entrepreneurial ecosystems more gender inclusive the chapters collectively highlight the impact of gender dynamics on entrepreneurial ecosystems and introduce innovative methods for fostering inclusivity With examples from around the globe they emphasise the actors and factors that matter for gender inclusive entrepreneurial ecosystems The book is interdisciplinary and will appeal to scholars upper level students and policymakers interested in entrepreneurship and gender inclusivity

Under the Influence John C. Mero, 2015-05-16 What are the potentially negative consequences of an undeniably good public policy Under the Influence examines how the Elks one of the oldest lodge based voluntary associations in America may have been impacted by government policies such as DUI laws To examine this empirically author John C Mero conducted interviews with fifty five California and Florida Elk Exalted Rulers What emerges from the interviews is a voluntary association in transition having been affected by stricter DUI laws and other government policies over the past few decades the Elks are reevaluating their approach to associational life They have demonstrated a willingness to change with the times since their founding as the Jolly Corks in 1884 and in response to the unintended consequences of more recent government policies the Elks are seeking new opportunities to contribute to American civil society
