Setup What The Air Force Did In Vietnam And Why:

Setup Earl H. Tilford, 1991 American military professionals especially the US Air Force have had a difficult time understanding their role in this nation's defeat in Vietnam Dr Tilford provides a critical self analysis and questions the underlying assumptions of the Air Force's strategy in Southeast Asia He argues that we must understand what went wrong in Vietnam and why and not manipulate the record and paint failure as victory He explains what led to the setup which not only resulted in a failure for airpower but also contributed to the fall of South Vietnam Laos and Cambodia to Communist forces in 1975 Setup Earl H. Tilford, Jr., 2002-04 Setup Earl H. Tilford, Air University Press, 2013-07 Setup Air University Press, U. S. Military, Department of Defense (DoD), Earl H. Tilford, U. S. Air Force (USAF), 2017-10-18 American military professionals especially the US Air Force have had a difficult time understanding their role in this nation's defeat in Vietnam Dr Tilford provides a critical self analysis and questions the underlying assumptions of the Air Force's strategy in Southeast Asia He argues that we must understand what went wrong in Vietnam and why and not manipulate the record and paint failure as victory He explains what led to the setup which not only resulted in a failure for airpower but also contributed to the fall of South Vietnam Laos and Cambodia to Communist forces in 1975 Tilford a retired Air Force officer and a widely respected historian in his own right is not squeamish about demolishing the myths that abound concerning the air war in Southeast Asia He is forthright in challenging both the USAF's strategic tunnel vision and the cherished misconceptions of many civilian historians whose criticisms of the air war in Vietnam are long on politics and short on facts The integrity of Dr Tilford's research his knowledge of air power theory and technology and his expertise as a historian all contribute to a high quality effort that proves among other things that neither the Air Force nor its civilian critics have yet secured a monopoly on truth In his analysis of the air war against North Vietnam Tilford presents one overwhelming lesson that USAF strategic bombing doctrine is ethnocentric and Eurocentric and is conceived utterly without regard to important cultural and political variations among potential adversaries This lesson more than any other is one that today's Air Force must learn if it is to establish any relevance in a post cold war world in which the global superpower war for which it has planned almost exclusively since 1945 becomes an ever more remote possibility Whatever the Air Force's operational role in the twenty first century turns out to be it seems likely that an air technocracy geared toward fighting a general war against a modern industrialized major power will become even less relevant than it proved to be in Korea and Vietnam At the very least the Air Force of the future will do well to heed Dr Tilford's other major conclusion that because war is more than sortie generation and getting ordnance on targets statistics are a poor substitute for strategy Contents FOREWORD PREFACE 1 IN THE TIME OF ATOMIC PLENTY Air Power Fulfilled The Road to a Separate Service The Atomic Bomb and the New Air Force Preludes to Vietnam The New Look and the Air Force Notes 2 SITUATIONS OF A LESSER MAGNITUDE The Kennedy Administration the Cold War and the Air Force The Laotian Factor In at the Beginning At War with the Army Notes 3 ROLLING THUNDER

Tilford, Jr.,Earl H. Tilford,2008-12-19 Tilford exposes the generals tunnel vision He demolishes the myth that the 1972 Christmas bombing brought Hanoi to its knees His controversial thesis is that the bombing of the North and the interdiction campaign against the Ho Chi Minh Trail were in no way decisive and that USAF leadership obtusely failed to perceive that North Vietnam an agricultural nation was simply not susceptible to strategic bombing Publishers Weekly hard hitting study on the failure of American air power in the Vietnam War The acute intellectual content of the book and the author's engaging writing style make the book easy to recommend Armed Forces Journal International *Military Aspects of the Vietnam Conflict* Walter L. Laslie, 2015-06-23 Laslie chronicles how the Air Force worked its way from the catastrophe of Vietnam through the triumph of the Gulf War and beyond Robert M Farley author of *Grounded* The U S Air Force's poor performance in Operation Linebacker II and other missions during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air

Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program s new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program s methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of advances in training but Laslie s unprecedented study of Red Flag addresses this oversight through its examination of the seminal program A refreshing look at the people and operational practices whose import far exceeds technological advances The Strategy Bridge

America in Vietnam Herbert Y. Schandler, 2009-08-16 This controversial and timely book about the American experience in Vietnam provides the first full exploration of the perspectives of the North Vietnamese leadership before during and after the war Herbert Y Schandler offers unique insights into the mindsets of the North Vietnamese and their response to diplomatic and military actions of the Americans laying out the full scale of the disastrous U S political and military misunderstandings of Vietnamese history and motivations Including frank quotes from Vietnamese leaders the book offers important new knowledge that allows us to learn invaluable lessons from the perspective of a victorious enemy Unlike most military officers who served in Vietnam Schandler is convinced the war was unwinnable no matter how long America stayed the course or how many resources were devoted to it He is remarkably qualified to make these judgments as an infantry commander during the Vietnam War a Pentagon policymaker and a scholar who taught at West Point and National Defense University His extensive personal interviews with North Vietnamese are drawn from his many trips to Hanoi after the war Schandler provides not only a definitive analysis of the American failure in Vietnam but a crucial foundation for exploring the potential for success in the current guerrilla wars the United States is fighting in Iraq and Afghanistan

Anti-Aircraft Artillery in Combat, 1950-1972 Mandeep Singh, 2020-04-30 An in depth look at the combat performance of ground based air defenses during the Korean War Vietnam War Middle East conflicts and other campaigns Though anti aircraft artillery was extensively used in combat in the First World War it wasn t until World War II that it came into prominence shooting down more aircraft than any other weapon and seriously degrading the conduct of air operations In the battle between the attackers and anti aircraft artillery the latter had the upper hand when the war ended The post war years saw a decline in anti aircraft artillery as peace prevailed and the advent of the jet aircraft seemed to tilt the balance in favor of the aircraft as they flew faster and higher seemingly beyond the reach of anti aircraft artillery It would take all the hi tech equipment and the guile and cunning that anti aircraft artillery could muster to try and reclaim pole position It is that story of the tug of war between the aircraft

and artillery that forms the narrative of this book as it traces the history of combat employment of anti aircraft artillery from the Korean War in effect the first Jet Age war to the War of Attrition between Arab states and Israel when the missiles came of age sending the aircraft scurrying for cover Mandeep Singh's book is the first attempt to look at the performance of anti aircraft artillery incorporating the views analyses and experiences of Soviet Arab and South Asian Armies through the major wars between 1950 and 1972
