Sex Shops And The Law:

Sex Shops and the Law Colin Manchester, 1986

(Sub)Urban Sexscapes Paul J. Maginn, Christine

Steinmetz, 2014-10-10 Sub Urban Sexscapes brings together a collection of theoretically informed and empirically rich case studies from internationally renowned and emerging scholars highlighting the contemporary and historical geographies and regulation of the commercial sex industry. Contributions in this edited volume examine the spatial and regulatory contours of the sex industry from a range of disciplinary perspectives: urban planning, urban geography, urban sociology, and cultural and media studies, and geographical contexts: Australia, the UK, US, and North Africa. In overall terms, Sub urban Sexscapes highlights the mainstreaming of commercial sex premises: sex shops, brothels, strip clubs, and queer spaces, and products: sex toys, erotic literature, and pornography, now being commonplace in night time economy spaces, the high street, suburban shopping centres, and the home. In addition, the aesthetics of commercial and alternative sexual practices, BDSM, and pornography permeate the sub urban landscape via billboards, newspapers, and magazines, television, music videos, and the Internet. The role of sex, sexuality, and commercialized sex in contributing to the general character of our cities cannot be ignored. In short, there is a need for policy makers to be realistic about the historical, contemporary, and future presence of the sex industry. Ultimately, the regulation of the sex industry should be informed by evidence, as opposed to moral panics. Winner of the Planning Institute of Australia WA 2015 Award for Excellence in Cutting Edge Research and Teaching.

Law and the Internet Lilian Edwards, Charlotte Waelde, 2009-09-10 This is the third edition of a successful book which offers students and practitioners an up to date overview of developments in Internet law and practice. The editors have once again assembled a team of specialist authors to write about those aspects of Internet law which are of special importance in the global regulation of the Internet and focussed around three principal themes: e commerce, intellectual property, and privacy, data protection, and cyber crime, with in addition a major contribution on Internet Governance. This edition incorporates for the first time areas such as data protection, privacy, and electronic surveillance, cyber crime, and cyber security, jurisdiction, and dispute resolution online. The section on IP contains clear and comprehensive analysis of the many and varied ways in which IP and the internet intersect, including open source licenses and the IP problems around search engines. The new edition also takes account of all current cases and legislation, including the draft revised EC Telecoms Package and the Audio Visual Media Services Directive. This book will be essential reading for students, teachers, and practitioners interested in Internet law and practice, as well as technologists and social scientists. The book is easy to read and has been well edited and flows smoothly through the various topics. The book provides a worthwhile overview of this developing area of law throughout the world. Peter Walsh, *International Trade Law Annual*, a thorough and stimulating survey, a good introduction for lawyers and students approaching Internet and e commerce law for the first time, and a useful course text. Brian Hutchinson, *The Irish Jurist*. *Medium Law* Daithí Mac Síthigh, 2017-09-13 Why should anyone care about the medium of communication today?

especially when talking about media law In today s digital society many emphasise convergence and seek new regulatory approaches In Medium Law however the medium theory insights of Harold Innis Marshall McLuhan and the Toronto School of Communication are drawn upon as part of an argument that differences between media and technological definitions continue to play a crucial role in the regulation of the media Indeed Mac S thigh argues that the idea of converged cross platform medium neutral media regulation is unattainable in practice and potentially undesirable in substance This is demonstrated through the exploration of the regulation of a variety of platforms such as films games video on demand and premium rate telephone services Regulatory areas discussed include content regulation copyright tax relief for producers and developers new online services conflicts between regulatory systems and freedom of expression This timely and topical volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Law Policy Regulation Media Studies Communications History and Cultural Studies
