Transformations Bridget Franklin, 2006-08-21 Including illustrated case study examples this original and groundbreaking book explores a wide range of literature combines social theory with elements from the built environment disciplines and explores how and why we build where we do *An Introduction to Urban Housing Design* Graham Towers, 2013-05-13 1

Unique introductory guide to urban housing design 2 An accessible text that outlines the current debate on urban planning and presents guidance for design solutions 3 Contemporary case studies showcase the best examples for high density housing design **London's Aylesbury Estate** Michael Romy, 2020-09-18 This book looks beyond the Aylesbury's public face by examining its rise and fall from the perspective of those who knew it based largely on the oral testimony and memoir of residents and former residents youth and community workers borough Councillors officials police officers and architects What emerges is not a simple story of definitive failures but one of texture and complexity struggle and accord family and friends and of rapidly changing circumstances The study spans the years 1967 to 2010 from the estate's ambitious inception until the first of its blocks were pulled down It is a period rarely dealt with by historians of council housing who have typically confined themselves to the years before or after the 1979 watershed As such it demonstrates how shifts in housing policy and broader political economic and social developments came to bear on a working class community for good and

more especially for ill **Poverty Today Issue 56 (September/October 2002)** , *The politics of housing* Peter Shapely, 2017-10-03 Exploring the politics of housing during 1890 1990 this fascinating study examines the interaction not only of national and local politics but also of local factors such as civic culture key local players local discourse and geographical and demographic problems This book argues that increasingly tenants acted as consumers of a public service and it questions the way in which notions of consumerism shaped responses to the housing debate An analysis of the impact of legislation on housing policy in different cities is provided as well as a more detailed account of the politics of housing in Manchester including the Victorian legacy the emergence of local government intervention post war overspill estates new system built flats and their rapid deterioration rising tenant anger and protests and the beginning of a new approach based on consultation and partnerships The book will be of value to anyone studying urban history politics governance civic culture social policy and society

Municipal Dreams John Boughton (Historian), 2018 Introduction How to provide housing for the people origins The world of the future the interwar period If only we will Britain reimagined 1940 51 The needs of the people council housing 1945 56 Get these people out of the slums 1956 68 Anti monumental anti stylistic and fit for ordinary people 1968 79 Rolling back the frontiers of the state 1979 91 Thrown away places 1991 7 A different kind of community 1997 2010 People need homes these homes need people 2010 to the present Social Housing and Urban Renewal Paul Watt, Peer Smets, 2017-08-15 Contemporary urban renewal is the subject of intense academic and policy debate regarding whether it promotes social mixing and spatial justice or instead enhances neoliberal privatization and state led gentrification This book offers a cross national perspective on contemporary urban renewal in relation to social rental housing

Urban Politics and Space in the Nineteenth and Twentieth Centuries Barry M. Doyle, 2009-10-02 This book addresses the increasing regionalisation of urban governance and politics in an era of industrialisation suburbanisation and welfare extension It provides an important reassessment of the role structure and activities of urban elites highlighting their vitality and their interdependence and demonstrating the increasing regionalisation of municipal politics as towns sought to promote themselves extend services and even expand physically onto a regional level Moreover it explores the discourses surrounding space in which gender class morality and community all feature prominently How urban space and its uses were defined and redefined became key political weapons across the regions of England in the nineteenth century and these chapters show how a range of sources maps poems songs paintings illustrated journalism social investigations historical texts were employed by contemporaries to shape the urban and its image often by placing it in a regional context or contributing to the creation of a regional image and identity This collection illustrates the continuing vitality of the study of urban politics and governance and presents a rare attempt to place English urban history in a regional context Barry Doyle has assembled an impressive team of experts on urban politics to examine not just party politics but the wider machinery of government the boards agencies and committees that shaped British towns and cities after 1830 Space and place were contested and

negotiated and a distinctive sense of local identity emerged In so doing the collection challenges some of the generalisations about the governance of urban Britain and reminds us that despite a shrinking globe the local and regional are crucial to our everyday lives The book should be read by all interested in and especially those working for local government Professor Richard Rodger University of Edinburgh In Urban Politics and Urban Space in the Nineteenth and Twentieth Centuries Regional Perspectives Barry Doyle brings together nine original essays by both established and younger authors to explore three inter related themes in urban history politics space and region from the early to mid nineteenth century to the mid twentieth century The book is conveniently divided into three sections dealing with structures of politics politics institutions and urban management and governance discourses and space Each of the contributions to this volume promises to both enrich our knowledge of specific moments in British politico urban development through the study of discrete developments in time and space and to open up and extend the debate on the British variant of urban modernity Each examines the ways in which local power space and regional relations developed and changed between the early nineteenth and mid twentieth century Localities their politics and communal identities are never really far from a national context indeed they largely shaped it as these essays make clear Doyle is to be commended for his endeavour not just as the editor but in particular for his introduction to the volume In a richly referenced essay that comes in at just over seven and half thousand words he casts a panoramic view over the field in the last few decades making connections where few contemporary urban historians care to tread Doyle gives us a forceful challenge to what he sees as a particularly English malaise in this period namely that of failing to recognise the potential of regional and local government to shape and manage the major reallocation of space and power a vital sphere of public life that is contemporary to our own times It is a masterly and well informed piece of writing that will set the standard for some years to come Professor Anthony McElligott University of Limerick

Estate Regeneration and Its

Discontents Paul Watt, 2021-03-31 It is widely accepted that London is in the midst of a serious housing crisis manifested most obviously in city s soaring rents While the causes of this crisis are manifold many people have come to argue that the diminished role of public housing which includes council estates is a major contributing factor Yet the bitter irony is that at a time of such massive housing shortages London s council estates are disappearing from the city s skyline in the name of

renewal and regeneration In *The Life and Death of London's Council Estates* Watt provides a systematic policy and sociological account of the transformation of council housing in London over the last three decades drawing on extensive fieldwork interviews and statistical and documentary analysis undertaken in several London boroughs The book explores what this dramatic shift in housing implies for ever widening inequality in London's distribution of wealth
