The Shifting Foundations of Modern Nation-states S. N. Godfrey, 2004-01-01 Nation states today are under pressure from opposite directions In Western Europe they are being challenged by the call of assimilation into a larger supra national polity Elsewhere as in Southeastern Europe nation states are being challenged by separatist forces from within demanding independence or self determination for particular ethnic groups In either instance the ultimate aim is not simply the breaking of bonds but rather a realignment of belonging When the prospect of prosperity and the good life requires an adjustment of national identities and alliances old myths and new tales alike are mobilized in the effort People's choices of belonging are flexible and often blatantly pragmatic Some will never renounce their original nation while others gladly assume two or three national identities in a lifetime all of them with a deeply felt commitment In The Shifting Foundations of Modern Nation States Sima Godfrey and Frank Unger have gathered together a distinguished multidisciplinary group of authors to discuss national myths from Europe North America and Asia Just as the plurality of nations implies diverse voices and distinct narratives the authors coming from different disciplines and backgrounds represent multiple discourses on the theme of The Cosmopolitan State H Patrick Glenn, 2013-05-23 For more than two centuries the idea of the nation nationhood state has been widespread The expression is now widely used and is even to be unavoidable. The nation state implies that the population of a state should be homogenous in terms of language religion and ethnicity the nation and the state should coincide However history demonstrates that there never has been and there never will be a nation state Human diversity is manifest in states of all sizes locations and origins This wide ranging book argues that there should be no regret in the recognition of this empirical reality since the notion of a nation state has been the justification for some of the worst atrocities in human history Since the nation state is impossible all states are cosmopolitan in character They are cosmopolitan regardless of the language of their constitutions or official teaching and regardless of the extent to which they officially recognize their own diversity The most successful states are those which are most successful in their own forms of cosmopolitanism Cosmopolitan ways are infinitely varied however and must be sought in the intricate workings of individual states The cosmopolitan character of states is necessarily reflected in their law The main instruments of legal cosmopolitanism have been those of common laws constitutionalism and what is best described as institutional cosmopolitanism The relative importance of these legal instruments has changed over time but all three have been constantly operative even in times of attempted national and territorial closure All three remain present in the contemporary cosmopolitan state understood in terms of cosmopolitan citizens cosmopolitan sources and cosmopolitan thought The cosmopolitan state is moreover the only appropriate conceptualization of the state in a time of globalization This book outlines the subtlety of the law of cosmopolitan states law which has survived through periods of nationalism and which provides the working methods for the reconciliation of diverse populations Combining law history political science political

philosophy international relations and the new logics it demonstrates that the idea of the nation state has failed and should yield to an understanding of the state as necessarily cosmopolitan in character This will be invaluable reading to all those interested in constitutional law international law and political theory The First World War and German National **Identity** Jan Vermeiren, 2016-07-18 An innovative study of the impact of the wartime alliance between Imperial Germany and Austria Hungary on German national identity Christianization in Early Medieval Transylvania, 2022-06-20 Little is known about the Christianization of east central and eastern Europe due to the fragmentary nature of the historical record Yet occasionally unexpected archaeological discoveries can offer fresh angles and new insights This volume presents such an example the discovery of a Byzantine like church in Alba Iulia Transylvania dating from the 10th century a unique find in terms of both age and function Next to its ruins another church was built at the end of the 11th century following a Roman Catholic architectural model soon to become the seat of the Latin bishopric of Transylvania Who built the older Byzantine style church and what was the political religious and cultural context of the church How does this new discovery affect our perception of the ecclesiastical history of Transylvania A new reading of the archaeological and historical record prompted by these questions is presented here thereby opening up new challenges for further research Contributors are Daniela Marcu Istrate Florin Curta Horia I Ciugudean Aurel Dragot Monica Elena Popescu C lin Cosma Tudor S l gean Jan Nicolae Dan Ioan Mure an Alexandru Madgearu G bor Thoroczkay va T th R v sz Boris Stojkovski erban Turcu Adinel C Dinc Mihai Kov cs Nicolae C lin Chif r Marius Mihail P sculescu and Ana Dumitran **After the Soviet Empire** ,2015-10-05 The break up of the Soviet Union is a key event of the twentieth century The 39th IIS congress in Yerevan 2009 focused on causes and consequences of this event and on shifts in the world order that followed in its wake This volume is an effort to chart these developments in empirical and conceptual terms It has a focus on the lands of the former Soviet Union but also explores pathways and contexts in the Second World at large The Soviet Union was a full scale experiment in creating an alternative modernity The implosion of this union gave rise to new states in search of national identity At a time when some observers heralded the end of history there was a rediscovery of historical legacies and a search for new paths of development across the former Second World In some parts of this world long repressed legacies were rediscovered. They were sometimes as in the case of countries in East Central Europe built around memories of parliamentary democracy and its replacement by authoritarian rule during the interwar period Some legacies referred to efforts at establishing statehood in the wake of the First World War others to national upheavals in the nineteenth century and earlier In Central Asia and many parts of the Caucasus the cultural heritage of Islam in its different varieties gave rise to new markers of identity but also to violent contestations In South Caucasus Georgia Armenia and Azerbaijan have embarked upon distinctly different but invariably contingent paths of development Analogously core components of the old union have gone through tumultuous but until the last year and a half largely bloodless transformations The crystallization of divergent paths of development in the two largest

republics of that union i e Russia and Ukraine has ushered in divergent national imaginations but also in series of bloody confrontations The Cambridge Companion to Nineteenth-Century American Literature and Politics John D. Kerkering, 2025-03-13 This volume addresses the political contexts in which nineteenth century American literature was conceived consumed and criticized It shows how a variety of literary genres and forms such as poetry drama fiction oratory and nonfiction engaged with political questions and participated in political debate Book Review Index ,2006 Every 3rd The Endurance of Nationalism Aviel Roshwald, 2006-09-14 A major new study of the issue is a quarterly cumulation ancient roots of nationalism and its enduring power in the modern world The Calling of the Nations Mark Vessey, Sharon Betcher, Robert Daum, Harry O. Maier, 2011-12-15 Current notions of nationhood communal identity territorial entitlement and collective destiny are deeply rooted in historic interpretations of the Bible Interweaving elements of history theology literary criticism and cultural theory the essays in this volume discuss the ways in which biblical understandings have shaped Western and particularly European and North American assumptions about the nature and meaning of the nation Part of the Green College Lecture Series this wide ranging collection moves from the earliest Pauline and Rabbinic exegesis through Christian imperial and missionary narratives of the late Roman medieval and early modern periods to the entangled identity politics of mainstream nineteenth and twentieth century North America Taken together the essays show that while theories of globalization postmodernism and postcolonialism have all offered critiques of identity politics and the nation state the global present remains heavily informed by biblical historical intuitions of nationhood IBSS: Political Science: 2005 Vol. 54 The British Library of Political and Economic Science, 2006-11-03 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world's most expert librarians and academics Breadth Today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage The IBSS reviews scholarship published in over thirty languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French Memorials in the Aftermath of Armed Conflict Marie Louise Stig Sørensen, Dacia Viejo-Rose, Paola Filippucci, 2019-12-13 Through case studies from Europe and Russia this volume analyses memorials as a means for the present to make claims on the past in the aftermath of armed conflict The central contention is that memorials are not backward looking inert reminders of past events but instead active triggers of personal and shared emotion that are inescapably political bound up with how societies reconstruct their present and future as they negotiate their way out of and sometimes back into conflict A central aim of the book is to highlight and illustrate the cultural

and ethical complexity of memorials as focal points for a tension between the notion of memory as truth and the practice of memory as negotiable By adopting a relatively bounded temporal and spatial scope the volume seeks to move beyond the established focus on national traditions to reveal cultural commonalities and shared influences in the memorial forms and practices of individual regions and of particular conflicts **Canadian Books in Print.
