WHERE THE SCIENCES AND BUDDHISM MEET

Jeremy W. Hayward

Linda E. Olds

Shifting Worlds, Changing Minds Jeremy W. Hayward,1987-10-12 From the author of Perceiving Ordinary Magic this book proposes that both science and Buddhism offer powerful insights into human nature that can help to bring about profound changes in our lives and our society Jeremy Hayward argues that a radical uprooting of our beliefs about reality is necessary if we are to resolve our confusion about our world and ourselves Only a profound examination of human perception a process by which worlds and selves are created and re created ever moment will provide the clarity and confidence we seek Shifting Worlds Changing Minds is an in depth non technical analysis of the perceptual process drawing on the latest data from cognitive science the new science of mind Added to these are insights gained from the Buddhist practice of mindfulness awareness meditation The results of this analysis and practice can free us from dependence on belief systems We are presented with a genuine revolution in the understanding of consciousness and the possibilities for awareness and compassion are revealed Toward a Transpersonal Ecology Warwick Fox,1995-01-01 In this book I advance an argument concerning the nature of the deep ecology approach to ecophilosophy In order to advance this argument in as thorough a manner as possible I present it within the context of a comprehensive overview of the writings on deep ecology

Buddhist Theology Roger Jackson, John Makransky, 2013-12-16 Scholars of Buddhism themselves Buddhist here seek to apply the critical tools of the academy to reassess the truth and transformative value of their tradition in its relevance to the **The Dialogical Spirit** Amos Yong, 2015-04-30 Contemporary proposals for Christian theology from contemporary world post liberalism to Radical Orthodoxy and beyond have espoused their own methodological paradigms Those who have ventured into this domain of theological method however have usually had to stake their claims vis a vis trends in what may be called the contemporary post al age whether of the post modern post Christendom post Enlightenment post Western or post colonial varieties. This volume is unique among offerings in this arena in suggesting a way forward that engages on each of these fronts and does so from a particularistic Christian perspective without giving up on Christian theology s traditional claims to universality This is accomplished through the articulation of a distinctive dialogical methodology informed by both Pentecostalism and Evangelicalism one rooted in the Christian salvation history narrative of Incarnation and Pentecost that is yet open to the world in its many and various cultural ethnic religious and disciplinary discourses Amos Yong here engages with twelve different interlocutors representing different ecumenical religious and disciplinary perspectives The Dialogical Spirit thus not only proffers a model for Christian theological method suitable for the twenty first century global context but also exemplifies this methodological approach through its interactions across the contemporary scholarly inter religious and theological landscape Metaphors of Interrelatedness Linda E. Olds, 1992-01-01 Olds examines the role of metaphor and models in psychology science and religion and argues the case for systems theory as a contemporary unifying metaphor across domains with particular emphasis on clarifying its potential for psychology **An Introduction to Comparative** 

**Philosophy** Walter Benesch, 1997-01-31 This original and accessible text is more than an introduction to comparative philosophy in the East and West It is also a guide to philosophizing as a thinking process In addition to outlining the presuppositions of different traditions it discusses their methods and techniques for reasoning in what the author calls four dimensions of philosophical space object subject the situational and the aspective perspective dimension **Justice** john a. powell, 2024 In Racing to Justice renowned social justice advocate john a powell persuasively argues that we have yet to achieve a truly post racial society and that there is much work to be done to redeem the American promise of inclusive democracy Gathered from a decade of writing about social justice and spirituality these meditations on race identity and social policy provide an outline for laying claim to our shared humanity and a way toward healing ourselves and securing our future With an updated foreword and a new chapter on polarization this new edition continues to challenge us to replace the attitudes and institutions that promote and perpetuate social suffering with those that foster relationships and a way of being that transcends disconnection and separation Racing to Justice is a thought provoking book that offers readers a look into the issues that continue to plague our society It is reminder that we have yet to address and reckon with the challenges we face in providing equal opportunities for all people in this country and the world **Human Development and the Spiritual Life** Ronald R. Irwin, 2012-12-06 The author proposes a theory of the development of consciousness in which ego is the central agent of socialization and culture and the driving force behind individual self control and self regulation He reviews the literature on identity and narrative outlines the fields of intellectual self moral and consciousness development and discusses the evidence indicating that the development of consciousness trancends the limitations of conventional ego development Warrior-King of Shambhala Jeremy Hayward, 2008 Ch gyam Trungpa was born in Tibet and strictly trained in the manner traditional for re incarnations of great teachers At the age of 19 he led 300 people over the Himalayas to India in a dramatic escape recounted in his autobiography Born in Tibet Over the following 30 years Trungpa became one of the foremost pioneers of Tibetan Buddhism in the West He was also a highly controversial figure considered by many to be one of the greatest Buddhist teachers ever to come to the west and viewed with suspicion by others He taught in a style that went altogether beyond conventional ideas of what a holy man should be like dressing in ordinary western clothes drinking and taking sexual consorts He taught in English with a direct and penetrating voice that drew to him many intelligent young students These memoirs tell the story of the author Jeremy Hayward a close student and friend of Trungpa Rinpoche who became a senior teacher and administrator in the organizations Rinpoche established This intimate chronological account opens with Hayward s first meeting with Trungpa Rinpoche in 1970 and progresses year by year until Rinpoche s death and beyond Each chapter year includes some discussion of the teachings that Rinpoche was presenting at that time as well as the context and atmosphere in which these teachings occurred and the evolution of the society and organizations which he inspired The book should be of interest to all students of Buddhism as well as others interested in the evolution of Buddhism

Alan Wallace, 2004 Reflecting its wide variety of topics Buddhism and science is comprised of three sections. The first presents two historical overviews of the engagements between Buddhism and modern science or rather how Buddhism and modern science have definced rivaled and complemented one another The second describes the ways Buddhism and the cognitive sciences inform each other the third address point of intersection between Buddhsim and the physical sciences On the broadest level this work illuminates how different ways of exploring the nature of human identity the mind and the universe at large can enrich and enlighten one Handbook of Religion and the Authority of Science Jim R.
