Shillay and the Seals Robert Atkinson,1980-01-01 *The War Against the Seals* Briton Cooper Busch,1987

Concentrates on the fur seals of the Bering Sea and the harp seals of the Newfoundland hunt Reveals the consequences of an industry s killing of more than 50 000 000 seals in a century and a half **The Magic of the Seal** Melanie

Godfrey,2024-07-26 This book will take you on a journey to awaken a spiritual relationship with the seal familiarizing you with the seal s anima as well as its history with the Gaelic ancestors of the British Isles The Clan of the Seal on North Uist and the traditional oral storytellers were the transmitters and custodians of folklore who told tales about the kindly selchie and revered seals as sacred akin to their own family The gentle seal will help reclaim what is lost within as we remember our Celtic heritage and identity in this fragile world Seal lore teaches valuable lessons in integrity and kindness and ignites our imagination leading us to the seal s inner landscape of presence and peace inevitably towards our own inner peace This is the magic of the seal not lost but found **Taking-Place: Non-Representational Theories and Geography** Ben

Anderson,2016-04-01 Emerging over the past ten years from a set of post structuralist theoretical lineages non representational theories are having a major impact within Human Geography Non representational theorisation and research has opened up new sets of problematics around the body practice and performativity and inspired new ways of doing and writing human geography that aim to engage with the taking place of everyday life Drawing together a range of innovative contributions from leading writers this is the first book to provide an extensive and in depth overview of non representational theories and human geography The work addresses the core themes of this still developing field demonstrates the implications of non representational theories for many aspects of human geographic thought and practice and highlights areas of emergent critical debate The collection is structured around four thematic sections Life Representation Ethics and Politics which explore the varied relations between non representational theories and contemporary human geography *British Seals (Collins New Naturalist Library, Book 57)* H. about the natural world in a way that considers both the problems and the progress in ecology and conservation Beginning with cottongrass whose snow white blooms blow gently in the wind across the wetter moors and bogs this is a year round trove of insight and knowledge for anyone who cares about the natural world from birdsong and biodiversity to sphagnum and species reintroduction Written by one of our most prominent advocates for rewilding the essays have a clear message Never give up on trying to conserve and restore wildlife and the wild places you cherish It s essential to try and to succeed And remember it s never if but when and with climate chaos closing in the time is now The Outer Hebrides Robert Emmott, Mike Sullivan, Tim Pickering, 2010 This guidebook contains 44 great sea kayak trips around the archipelago of the Outer Hebrides Berneray to the Butt of Lewis and including St Kilda The book presents all the navigational and tidal information a sea kayaker needs on this section of coast **This Shrinking Land** Robert Duck, 2019-07-29 The oceans are the graveyards of the lands Lands become eaten away by the action of the seas and it is no surprise to find that most of the world s shorelines are in a state of erosion The fringes of Britain its cliffs and beaches are shrinking disappearing into the surrounding sea as a result of coastal flooding erosion and landsliding Is climate change speeding up the process are our homes our villages and towns at risk This book examines how the British coast is changing and why and what is being done to protect this island nation Are we doing enough Should we abandon vulnerable towns and villages to the seas as our forebears did and relocate coastal settlements inland These are some of the difficult and potentially emotive questions that this book explores Blending contemporary earth science and societal themes with historical and cultural records and a hint of myth and romance for good measure This Shrinking Land is a fascinating study of what we must learn from the past in order to manage the future of Britain s coasts With more than 100 illustrations most of them in colour this is a stunning book

Proceedings of the Zoological Society of London Zoological Society of London, 1964 Seal-folk and Ocean Paddlers John MacAulay, 1998 Foremost in Scottish Hebridean tradition are the tales of the sea folk seals who could assume human form but could not return to the sea without their sealskin belts Against the background of such beliefs the fact of strange people in kayaks being occasionally seen around the islands off the north and west of Scotland was probably not worth special mention until travellers from the mainland heard of these sightings in the 17th and 18th centuries This study draws together historical fact and maritime folklore to reveal some spellbinding mysteries of the ocean involving seals and kayaks Norse ancestry and the children of the seal Recent Polar and Glaciological Literature , 1981 The Behaviour of Pinnipeds D. Renouf, 2012-12-06 We teach our students of behavioural science that one first defines a research problem and then the most appropriate animal is selected to investigate hypotheses The reverse order of events is improper a particular class of animals should not be studied for its own sake In the case of the Pinnipeds seals sea lions fur seals and walruses the organism and the problem are essentially the same The research questions presented in this volume in one way or another relate to survival in two worlds the ocean for foraging and the terrain at its edge or frozen above it for breeding The

evolution of Pinniped behaviour and the mechanisms which underlie it are a consequence of having to cope with two seemingly incompatible sets of environmental constraints The physiological adaptations for concomitant functioning in two media with very different physical characteristics have produced correlated behavioural modifications The energetic demands of reproduction and foraging are idiosyncratic because each activity occurs on opposite sides of the air water interface As a result the mating system must reconcile aquatic design for such functions as locomotion and thermoregulation with the terrestrial requirements for successful pupping Similarly the ecology of this dual habitat prescribes the rules governing the behaviour of the neonate and its interactions with its mother
