No experiment within the ship's cabin can detect the ship's motion if the ship moves in the same direction at a constant velocity. This is still true, even when considering the speed of light.

Frame of reference where water is at rest vs. frame of reference where ship is moving at constant velocity

*Singular Thought and Mental Files* Rachel Goodman, James Genone, Nick Kroll, 2020-02-06 The notion of singular or de re thought has become central in philosophy of mind and language yet there is still little consensus concerning the best way to think about the nature of singular thought Coinciding with recognition of the need for more clarity about the notion there has been a surge of interest in the concept of a mental file as a way to understand what is distinctive about singular thought What isn't always clear however is what mental files are meant to be and why we should believe that thoughts that employ them are singular as opposed to descriptive This volume brings together original chapters by leading scholars which aim to examine and evaluate the viability of the mental files framework for theorizing about singular thought The first section of the volume addresses the central issues of the definition and nature of singular thought as well as how it relates to the notion of a mental file The second section addresses the legitimacy of the mental files conception of singular thought by assessing the philosophical motivations or the purported empirical support for the view or by laying out a specific version of it The third section helps to clarify both the notion of a mental file and the mental files conception of singular thought by focusing on their role in explaining de jure coreference in thought and language The volume then concludes with a final section that casts doubt on the mental files conception and the legitimacy of the file theoretic framework more generally **Confed: 2721**
