The Merchant Ship in the British Atlantic, 1600-1800 Phillip Reid, 2020-04-14 In *The Merchant Ship in the British Atlantic 1600-1800* Phillip Reid refutes the long held assumption that merchant ship technology in the British Atlantic during the two centuries of its development was static for all intents and purposes and that whatever incremental changes took place in it were inconsequential to the development of the British Empire and its offshoots. Drawing on a unique combination of evidence from both traditional and unconventional sources Phillip Reid shows how merchants, shipwrights and mariners used both proven principles and adaptive innovations in hulls, rigs and steering systems to manage high physical and financial risks.
