Miller, William M. Tsutsui, 2024-11-30 Japan's oceans demand our attention. Violent, prolific and changeful, they define life and death on the archipelago, pushing the shore under the rush of tsunamis, charging typhoons, circulating feeding millions and seeding conflicts over territory and resources. And yet Japan studies remains largely beholden to a terrestrial view of the world that is at odds with the importance of the sea. This terrestrial bias also means that on those occasions when oceans are recognized, they are most often presented as dividers or connectors, spaces in between rather than rich ecologies and meaningful sites. Oceanic Japan is meant to help readers re-envision Japanese history in order to show how the seas created the country that we know today. The book convenes a diverse multinational multidisciplinary group of scholars to expand the scope of Japan studies and the field of environmental humanities. The chapters draw from the broader turn to the sea, characterized by new oceanic and terraqueous perspectives developing within these fields and in areas such as Pacific history and Indian Ocean studies. The volume editors' vision is bifocal. On one hand, they aim to reorient East Asian studies and Japan studies to the sea, underlining how oceans have shaped dynamics from the Tokugawa Era forward into the age of empire and the crisis of the Anthropocene. On the other hand, they argue for a more nuanced environmental approach within the burgeoning field of Oceanic studies. Seeing oceanic spaces as more than entrepôts or political spheres requires thinking in new, often vertical, volumetric ways. The chapters follow human and non-human actors to recognize the variegation of watery ecologies through winds, tides, coasts, seabeds, and currents, such as the Kuroshio and Oyashio, which have always shaped life on the archipelago.

Lives & Legends of the Christmas Tree Ships Fred Neuschel, 2007 The real-life stories behind one of the most popular tales of the Great Lakes: the 1912 sinking of the Rouse Simmons. Missions Howard Benjamin Grose, 1924 *Ethnographic Study of Marine Conservation* Izumi Tsurita, 2022-05-03 This book explores the nature of marine conservation based on the case study of Hinase, a fishing village in Okayama, Japan. It focuses on the fishers' self-motivated eelgrass restoration activity, which has been continued for more than 30 years. This activity in Hinase recently attracted international attention as a case under the name Satoumi and Marine Protected Areas in several governmental reports, but detailed information such as the historical background and social structure of Hinase has not yet been analyzed. This book therefore fulfills this gap by providing its ethnographic information. In addition, this book offers some points for critical thinking by concluding that marine conservation activities cannot always be evaluated or arranged under the standardized approach with limited time and space. This viewpoint reaffirms the importance of local initiative and highlights the value of qualitative research to seek the way forward for promising marine conservation. This book is suitable for an academic audience in the field of social sciences, such as applied anthropology, as well as ecologists, government officials, environmentalists, and citizens who are interested or engaged in environmental issues or natural resource management.

A Short History of Transport in Japan from Ancient Times to the Present John Andrew Black, 2022-03-18 A Short History of Transport in Japan from Ancient Times to the Present is a unique study, the first by a Western scholar to place the long

term development of Japanese infrastructure alongside an analysis of its evolving political economy Drawing from New Institutional Economics Black offers a historically informed critique of contemporary planning using the example of Japan s historical institutions their particular biases and the power they have exerted over national and local transport to identify how reformed institutional arrangements might develop more sustainable and equitable transport services With chapters addressing each major form of transport Black examines the predominant role of institutions and individuals from seventeenth century shoguns to post war planners in transforming Japan s maritime infrastructure its roads and waterways and its adoption of rail and air transport Using a multidisciplinary comparative and chronological approach the book consults a range of technical cultural and political sources to tease out these interactions between society and technology This spirited new contribution to transport studies will attract readers interested in institutional power the history of transport and the development of future infrastructure as well as those with a general interest in Japan

The novel begins with Richard Pappen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
