But what extraordinary things have been found despite the depth and waves? The Wall Street Journal From National Book Award-winning author Martin W. Sandler here is a fascinating look at what shipwrecks reveal about our world's past and how exploring them led to the development of a whole new field of science: marine archaeology. Most of the world's ocean floor remains to be discovered. In fact, it's estimated to be home to over 3 million sunken vessels and countless treasures of the past. This enthralling and adventure-filled nonfiction book for young readers recounts some of the most captivating shipwrecks from history, ranging from the *Shinan*, a Chinese merchant ship laden with riches from the 14th century, to the HMS *Erebus* and *Terror*, two polar exploration ships that mysteriously disappeared in the early 1800s. Combining new research, stunning archival material, and vivid storytelling, *Shipwrecked* dives deep into the world of marine archaeology and shows young readers what each discovery reveals about the world before our time. **The Three Voyages**

Discover the world of shipwrecks and an amazing wealth of undersea treasures and secrets with *Eyewitness Shipwreck*. **Fortuna** Carole Bradshaw, 2010-02 I chose to use the image of a tile as

the cover of *Fortuna* because for me that's how the story began with a small piece of red tile that washed up on the beach on Long Beach Island, New Jersey, in 1970. More than half a century before the *Fortuna*, loaded with roofing tiles for ballast, set sail on a two-year voyage to New York, just short of her final destination, she became one more shipwreck off the coast of Long Beach Island. Those tiles were her calling cards. *Fortuna* almost ended the same as it started. While photographing the

tile for the cover of this book a huge wave came in and washed the tile back into the sea But like all the other pieces of this story that landed at my feet the tile washed back onto the beach five days later
