## Shooting The Moon:

*Shooting the Moon* Brian Willems, 2015-05-29 Films about the moon show that even after the lunar landing of 1969 our celestial neighbor has lost none of its aptitude for being made of green cheese In fact as soon as you put the moon on screen it is lost This is equally true for a wide range of moon films including the theatricality of *Moon* the incredulity of camp the illegibility of footage shot by Apollo astronauts and the revisionary history of *Transformers 3* Yet as paradoxical as it might seem at first it is only when we lose sight of the moon that lunar truths begin to come forth This is because fantastic elements of the moon by their mere absurdity can indicate non fantastic elements However what is of interest here is not realistic or fantastic lunar truths but rather that the moon is an object which invites or even demands more than one truth at once
