Labour's Apprentices Michael J. Childs, 1994-11 The three decades before the First World War witnessed significant changes in the working life home life and social life of adolescent English males In *Labour's Apprentices* Michael Childs suggests that the study of such age specific experiences provides vital clues to the evolving structure and fortunes of the working class as a whole and helps to explain subsequent development in English history Beginning with home life Childs discusses the life cycle of the working class family and considers the changes that becoming a wage earner and a contributor to the family economy made to a youth's status He explores the significance of publicly provided education for the working class and analyses the labour market for young males focusing on the role of apprenticeship the impact of different types of labour on future job prospects the activities of trade unions and wage levels Childs makes a detailed investigation of the patterns of labour available to boys at that time including street selling half time labour and apprenticed labour versus free labour He argues that such changes were a major factor in the creation of a semi skilled adult workforce Childs then examines the choices that working class youths made in the area of their greatest freedom leisure activities He looks at street culture commercial entertainments and youth groups and movements and finds that each influenced the emergence of a more cohesive and class conscious working class during the period up to the First World War

When Ladies Go A-thieving Elaine S. Abelson, 1992 This book focuses on middle class urban women as participants in new forms of consumer culture Within the special world of the department store women found themselves challenged to resist the enticements of consumption Many succumbed buying both what they needed and what they desired but also stealing what seemed so readily available Pitted against these middle class women were the management detectives and clerks of the department stores Abelson argues that in the interest of concealing this darker side of consumerism women of the middle class but not those of the working class were allowed to shoplift and plead incapacitating illness kleptomania The invention of kleptomania by psychiatrists and the adoption of this ideology of feminine
