Short History Of Medieval Philosophy:

A Short History of Medieval Philosophy Julius Rudolf Weinberg, 2018-06-05 In this brief book the author examines the central doctrine of important Christian Jewish and Muslim philosophers and shows the contributions of medieval thought to present day philosophy Intended not only for philosophers but for anyone seeking a concise and reliable survey [A Short History of Medieval Philosophy](#) Julius Rudolph Weinberg, 2013 **A Short History of Medieval Philosophy** Julius Rudolph Weinberg, 1969 **A Short History of Medieval Philosophy** Kaoru Aoki, 1964 **A Short History of Medieval England** Alan Gordon Smith, 1925 **A Short History Western Philosophy** Johannes Hirschberger, 2019-07-23 A study of the historical development of philosophy both requires and stimulates intellectual detachment The person who limits himself to the present can easily fall a prey to passing fashions he becomes a slave of the latest ism Intellectually rootless and inexperienced he succumbs to something that may exercise considerable attraction at this particular moment but that soon withers and passes For example Ernst Haeckel s theories once exercised an enormous fascination on all sorts of people they were even hailed as the definitive word in philosophy Nowadays they are more likely to cause amusement than anything else The same may be said of Nietzsche s philosophy or materialism or vitalism or idealism [Later Medieval Philosophy](#) John Marenbon, 2002-01-22 This introduction to philosophy in the Latin West between 1150 and 1350 combines an historical approach which concentrates on the sources forms and backgrounds of the medieval works with philosophical analysis of thirteenth and fourteenth century writing in terms comprehensible to a modern reader Part One looks at the intellectual and historical context of medieval thought It examines the courses in the medieval universities the methods of teaching the forms of written work the logical techniques used for argument and analysis the translation and the availability of Ancient Greek Arab and Jewish philosophical texts the challenges the new material presented and the various ways in which Western thinkers responded to them Part Two focuses on one important problem in later medieval thought the nature of intellectual knowledge It explains the arguments given by Aristotle his antique commentators and the Arab philosophers Avicenna and Averroes and traces how a series of Western thinkers including Thomas Aquinas and William of Ockham developed modified or rejected them **The Middle Ages** Frank N. Magill, 2012-11-12 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who s who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual s life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual s place in history All entries conclude with a fully annotated bibliography *Medieval Philosophy: A Very Short Introduction* John Marenbon, 2016-01-28 For many of us the term medieval philosophy conjures up the figure of Thomas Aquinas and is closely intertwined with religion In this Very Short Introduction John Marenbon shows how medieval

philosophy had a far broader reach than the thirteenth and fourteenth century universities of Christian Europe and is instead one of the most exciting and diversified periods in the history of thought

Introducing the coexisting strands of Christian Muslim and Jewish philosophy Marenbon shows how these traditions all go back to the Platonic schools of late antiquity and explains the complex ways in which they are interlinked Providing an overview of some of the main thinkers such as Boethius Abelard al Farabi Avicenna Maimonides and Gersonides and the topics institutions and literary forms of medieval philosophy he discusses in detail some of the key issues in medieval thought universals mind body and mortality foreknowledge and freedom society and the best life

Michel Foucault Philip Barker, 2020-07-24 This unique and original study analyzes Foucault's interaction with the history of ideas undertaking a genealogy of the subject that subverts conventional philosophical history to develop a distinctly Foucauldian intellectual history Through a detailed account of Foucault's work and its relation to the history of ideas Philip Barker shows how that history can be usefully reconceptualised using Foucault's concepts of genealogy and archaeology Locating the emergence of self reflexive consciousness in twelfth century philosophy and elaborating upon autobiography as a philosophical persona Barker argues that this extremely productive approach can be used to analyze the relationship between the history of philosophy psychoanalysis and the transparent subject

The 'Metaphysica' of Avicenna (ibn Sīnā) Parviz Morewedge, 2015-10-14 In this book first published in 1973 Professor Parviz Morewedge an expert on Islamic philosophy and mysticism provides a critical exposition of one text of ibn Sina Avicenna the great Persian philosopher who lived from 980 to 1037 The text is his *Metaphysica* in the *Danish Nama* I ala I The Book of Scientific Knowledge In addition to a translation of the text from Persian into English this edition includes a critical commentary on the major arguments found in the text and notes and references to other texts of ibn Sina as well as to relevant texts of Greek philosophers particularly Aristotle Plotinus and Proclus There is also a glossary of the key terms used in the *Metaphysica* with their Persian Arabic Greek and Latin equivalents where necessary This book is concerned primarily to show that although in the text ibn Sina resorts to the Aristotelian vocabulary and Neo Platonic themes and appears to be in accord with the Islamic tradition there is evidence that many doctrines expressed by him may be considered non Greek and non Islamic These include his peculiar doctrine of Self nafs and the doctrine of the Necessary Existent *wajib al wujud* The author attempts to clarify the extent to which salient features of ibn Sina's position are in agreement with what may be regarded as Sufic doctrines

The Foundations of Modern Science in the Middle

Ages Edward Grant,1996-10-28 Contrary to prevailing opinion the roots of modern science were planted in the ancient and medieval worlds long before the Scientific Revolution of the seventeenth century Indeed that revolution would have been inconceivable without the cumulative antecedent efforts of three great civilisations Greek Islamic and Latin With the scientific riches it derived by translation from Greco Islamic sources in the twelfth and thirteenth centuries the Christian Latin civilisation of Western Europe began the last leg of the intellectual journey that culminated in a scientific revolution that transformed the world The factors that produced this unique achievement are found in the way Christianity developed in the West and in the invention of the university in 1200 As this 1997 study shows it is no mere coincidence that the origins of modern science and the modern university occurred simultaneously in Western Europe during the late Middle Ages

Aquinas F. Copleston,1991-07-25 Aquinas 1224 74 lived at a time when the Christian West was opening up to a wealth of Greek and Islamic philosophical speculation An embodiment of the thirteenth century ideal of a unified interpretation of reality in which philosophy and theology work together in harmony Aquinas was remarkable for the way in which he used and developed this legacy of ancient thought an achievement which led his contemporaries to regard him as an advanced thinker Father Copleston's lucid and stimulating book examines this extraordinary man whose influence is perhaps greater today than in his own lifetime and his thought relating his ideas wherever possible to problems as they are discussed today

Angels George J. Marshall,2008-05-23 In the 1990s alone more than 400 works on angels were published adding to an already burgeoning genre Throughout the centuries angels have been featured in among others theological works on scripture studies in comparative religions works on art architecture and music philological studies philosophical sociological anthropological archeological and psychological works and even a psychoanalytical study of the implications that our understanding of angels has for our understanding of sexual differences This bibliography lists 4 355 works alphabetically by author Each entry contains a source for the reference often a Library of Congress call number followed by the name of a university that holds the work More than 750 of the entries are annotated Extensive indexes to names subjects and centuries provide further utility

Contingency and Freedom Anthonie Vos Jaczn.,Henri Veldhuis,Aline H. Looman-Graaskamp,E. Dekker,Nico W. den Bok,2013-04-17 During the seventies there was a revival of systematic philosophy in general and of ontology in particular At the same time especially in Anglo Saxon thinking systematic philosophy interacted very creatively with the history of medieval philosophy It seems to us that the work of John Duns Scotus 1266 1308 could substantially benefit these developments Not only this but his works cries out to be developed across the whole spectrum of theology that science which in the Middle Ages ruled all others regina scientiarum This book is the outcome of several years of scholarship and friendship during which guided by Dr A Vos we have studied the work of Scotus Our research group is connected to the Theological Faculty of Utrecht and to the Dutch Franciscan Study Centre Stichting Franciscaans Studiecentrum This study presents a translation and commentary of Lectura I 39 which in our view is notable as one of the key texts in the history of

systematic theology and philosophy In this book we have used specialist language and argumentation but at the same time have taken pains to make it useful to a circle of interested readers wider than simply that of those well versed in medieval scholasticism In this way we hope to present the difficult but instructive work of the subtle master doctor subtilis in such a way as to make it attractive to other scholars and students in theology and philosophy Science and Religion Lucas F. Johnston, Whitney Bauman, 2014-02-05 This collection offers new perspectives on the study of science and religion bringing together articles that highlight the differences between epistemological systems and call into question the dominant narrative of modern science The volume provides historical context for the contemporary discourse around religion and science detailing the emergence of modern science from earlier movements related to magic and other esoteric arts the impact of the Reformation on science and the dependence of Western science on the so called Golden Age of Islam In addition contributors examine the impacts of Western science and colonialism on the ongoing theft of the biological resources of traditional and indigenous communities in the name of science and medicine The volume's multi-perspectival approach aims to refocus the terms of the conversation around science and religion taking into consideration multiple rationalities outside of the dominant discourse Medieval Supposition Theory Revisited, 2013-10-10 In 1962 1967 Professor L M de Rijk published his *Logica Modernorum A Contribution to the History of Early Terminist Logic* The first part 1962 has the title *On the Twelfth Century Theories of Fallacy* The second part two volumes 1967 has as title *The Origin and the Early Development of the Theory of Supposition* De Rijk's *Logica Modernorum* provides the basis for the modern study of medieval theories of supposition Now nearly 50 years later scholars have made great progress in the study of the properties of terms De Rijk's study was primarily about the early development of terminist logic i e during the 12th and 13th centuries Scholars have also investigated later developments well into the sixteenth and seventeenth centuries Not only logical texts but also texts on grammar have been published Many of the scholars who have contributed to this development present papers in this volume Contributors are Fabrizio Amerini Jenny Ashworth Allan Bick Bert Bos Julie Brumberg Chaumont Laurent Cesalli Lambert Marie de Rijk Sten Ebbesen Alessandro Conti Catarina Dutilh Novaes Onno Kneepkens Costantino Marmo Dafne Mure Claude Panaccio Ernesto Perini Santos Joel Lonfat Angel d Ors G ran Sundholm and Luisa Valente Renaissance Syntax and Subjectivity John C. Leeds, 2017-03-02 The relationship between Latin and the Scots vernacular in the chronicle literature of 16th century Scotland provides the topic for this study John Leeds here shows how the disposition of grammatical subjects in the radically dissimilar syntactic systems of humanist neo Latin and Scots conditions the way in which the subject i e the human individual and its actions are conceived in the writing of history In doing so he extends the boundaries of existing critical literature on early modern subjectivity to include the subject of grammar analyzing its incorporation into narrative sentences and illuminating the ideological contents of different systems for its deployment Though focused on the chronicles of Renaissance Scotland the argument can in principle be applied to the entire range of

Latin vernacular relations during the early modern period While examining the intellectual culture of early modernity Leeds also takes aim at every stage of his argument at the semiotic and social constructionist orthodoxies that dominate the humanities today Against the notion that human subjects are discursive constructs he argues for the subordination of discourse to realities both material and immaterial that are external to language As part of this argument he proposes a view of neo Latin humanism as a resistance to the onset of modernity arguing that Latin prose provides options at once syntactic ideological and ontological that vernacular culture has to its considerable detriment foreclosed In sum Leeds advocates a renewed and theoretically informed commitment to the humanism that the humanities themselves have been at such pains during the last scholarly generation to depreciate

Christology and Atonement Guus H. Labooy, 2024-02-15 This scotistic study in analytical theology presupposes Conciliar Christology and aims at a more profound understanding of two vital and connected Christian doctrines Christology and atonement The beating heart of the first part is Duns Scotus's compelling analysis of the incarnation his uniquely successful analysis of the hypostatic union Following Marilyn McCord Adams Guus H Labooy argues that the problem of Christological predication can be solved by probing the metaphysical backbone of qua propositions expressions like as regards his Godhead and as regards his manhood Labooy dedicates the second part of the book to the analysis of atonement especially to its most controversial aspect penal substitution The Messiah dying for our sins is perhaps the storm centre of the confrontation between Christian faith and the secular intellectual mindset Labooy argues on exegetical grounds that all the current models of atonement are complementary None of them should be discarded and neither should penal substitution The account of penal substitution or vicarious penance he defends is shaped with the decisive aid of Scotus's analytical tools
