Griselda Pollock, 2005-08-12 In *Generations and Geographies in the Visual Arts: Feminist Readings* the challenge of contemporary feminist theory encounters the provocation of the visual arts made by women in the twentieth century. The major issue is difference: sexual, cultural, and social. The book points to the singularity of each artist's creative negotiation of time and historical and political circumstance. Griselda Pollock calls attention to the significance of place, location, and cultural diversity, connecting issues of sexuality to those of nationality, imperialism, migration, diaspora, and genocide.

Vermeer's Family Secrets Benjamin Binstock, 2013-03-07 Johannes Vermeer, one of the greatest Dutch painters and for some the single greatest painter of all, produced a remarkably small corpus of work. In *Vermeer's Family Secrets*, Benjamin Binstock revolutionizes how we think about Vermeer's work and life. Vermeer's *The Sphinx of Delft* is famously a mystery in art; despite the common claim that little is known of his biography, there is actually an abundance of fascinating information about Vermeer's life that Binstock brings to bear on Vermeer's art. For the first time, he also offers new interpretations of several key documents pertaining to Vermeer that have been misunderstood. Lavishly illustrated with more than 180 black and white images and more than sixty color plates, the book also includes a remarkable color two-page spread that presents the entirety of Vermeer's oeuvre arranged in chronological order in 1:20 scale, demonstrating his gradual formal and conceptual development. No book on Vermeer has ever done this kind of visual comparison of his complete output. Like Poe's purloined letter, Vermeer's secrets are sometimes out in the open where everyone can see them. Benjamin Binstock shows us where to look. Piecing together evidence, the tools of art history, and his own intuitive skills, he gives us for the first time a history of Vermeer's work in light of Vermeer's life. On almost every page of *Vermeer's Family Secrets*, there is a perception or an adjustment that rethinks what we know about Vermeer, his oeuvre, Dutch painting, and Western Art. Perhaps the most arresting revelation of *Vermeer's Family Secrets* is the final one, in response to inconsistencies in technique, materials, and artistic level. Binstock posits that several of the paintings accepted as canonical works by Vermeer are in fact not by Vermeer at all, but by his eldest daughter, Maria. How he argues this is one of the book's many pleasures.

The Present Prospects of Social Art History Robert Slifkin, Anthony E. Grudin, 2021-03-25 The *Present Prospects of Social Art History* represents a major reconsideration of how art historians analyze works of art and the role that historical factors, both those at the moment when the work was created and when the historian addresses the objects at hand, play in informing their interpretations. Featuring the work of some of the discipline's leading scholars, the volume contains a collection of essays that consider the advantages, limitations, and specific challenges of seeing works of art primarily through a historical perspective. The assembled texts, along with an introduction by the co-editors, demonstrate an array of possible methodological approaches that acknowledge the crucial role of history in the creation, reception, and exhibition of works of art.

Chinese Painting and Its Audiences Craig Clunas, 2023-10-17 A history of the reception of Chinese painting from the sixteenth century to the present. What is Chinese painting? When did it begin? And what are the different associations of this term in

China and the West In Chinese Painting and Its Audiences which is based on the A W Mellon Lectures in the Fine Arts given at the National Gallery of Art leading art historian Craig Clunas draws from a wealth of artistic masterpieces and lesser known pictures some of them discussed here in English for the first time to show how Chinese painting has been understood by a range of audiences over five centuries from the Ming Dynasty to today Chinese Painting and Its Audiences demonstrates that viewers in China and beyond have irrevocably shaped this great artistic tradition Arguing that audiences within China were crucially important to the evolution of Chinese painting Clunas considers how Chinese artists have imagined the reception of their own work By examining paintings that depict people looking at paintings he introduces readers to ideal types of viewers the scholar the gentleman the merchant the nation and the people In discussing the changing audiences for Chinese art Clunas emphasizes that the diversity and quantity of images in Chinese culture make it impossible to generalize definitively about what constitutes Chinese painting Exploring the complex relationships between works of art and those who look at them Chinese Painting and Its Audiences sheds new light on how the concept of Chinese painting has been formed and reformed over hundreds of years Published in association with the Center for Advanced Study in the Visual Arts National Gallery of Art Washington DC Please note All images in this ebook are presented in black and white and have been reduced in size

Weaving Modernism K. L. H. Wells, 2019-01-01 An unprecedented study that reveals tapestry's role as a modernist medium and a model for the movement's discourse on both sides of the Atlantic in the decades following World War II

Cheyney Thompson Christian Schaernack, 2023-06-06 One of the first book length publications on contemporary artist Cheyney Thompson whose work is known for its radically forward looking intellectualism and formal rigor Cheyney Thompson's b 1975 work responds to a long history of debates about how art depicts the world and about how we come to know the world visually In these meditations on the artist's work Christian Schaernack shows that for Thompson reality is something that we can know only in terms of probabilities not absolutes Thompson often produces work that explores contingency at the formal level sometimes in his artistic process itself as Jackson Pollock once did and sometimes through the use of external constraints such as computer algorithms which he subverts as often as he follows The meaning of observation has changed time and time again in the history of art just as it has in the history of science Delving into art history intellectual history and contemporary continental philosophy Schaernack offers a multifaceted study of an artist who challenges our assumptions about how the world is ordered From Thompson's early black paintings to his Chronochromes to the Stochastic Process Paintings which engage with the algorithms that govern our digital lives Schaernack presents a contemporary artist whose work embraces chance and responds to the shifting conditions of the present This is art that reimagines artwork itself
