The Architecture of Late Assyrian Royal Palaces David Kertai, 2015 The Late Assyrian Empire c 900 612 BCE was the first state to rule over the major centres of the Middle East and the Late Assyrian court inhabited some of the most monumental palaces of its time The Architecture of Late Assyrian Royal Palaces is the first volume to provide an in depth analysis of Late Assyrian palatial architecture offering a general introduction to all key royal palaces in the major centres of the empire Assur Kaluhu Dur Sharruken and Nineveh Where previous research has often focused on the duality between public and private realms this volume redefines the cultural principles governing these palaces and proposes a new historical framework analysing the spatial organization of the palace community which placed the king front and centre It brings together the architecture of such palaces as currently understood within the broader framework of textual and art historical sources and argues that architectural changes were guided by a need to accommodate ever larger groups as the empire grew in size

New Glass Architecture Brent Richards, Gilbert Dennis, 2006-01-01 A timely look at the ways in which glass is utilized in some of today s most beautiful and experimental building designs For centuries glass has provoked fascination with its properties as a versatile material that permits light to enter buildings in spectacular ways Much of modern architecture has been conceived by using glass to create increasingly minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings New Glass Architecture showcases the changing ways that aesthetics and methods for using glass have been developing since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings New Glass Architecture features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthaus Graz Austria Laban Dance Centre London Torre Agbar Barcelona *A Companion*
