Bisphosphonates and Osteonecrosis of the Jaw: A Multidisciplinary Approach Francesco Saverio De Ponte, 2011-11-25 During the early 19th century it was discovered that adding yellow now called white phosphorous to matchstick heads made it easier to ignite matches The phosphorous vapors were breathed in by workers and combined with other chemicals in the body to produce a potent nitrogen containing bisphosphonate Today's oral nitrogen containing

bisphosphonates and intravenous nitrogen containing bisphosphonates circulate around the body the same way as the phosphorous vapors and are absorbed into bone and ingested by osteoclasts When this unique binding process of bisphosphonates to bone occurs osteoclasts are poisoned and this reduces or eliminates bone turnover Alveolar bone in the mandible and maxilla turns over more rapidly than in long bones so the jaws are a better target for bisphosphonate toxicity It wasn't until 2003 that today's intravenous and oral nitrogen containing bisphosphonate medications were implicated as major risk factors in the development of exposed necrotic bone of the jaws Most of the researchers who reported cases of bisphosphonate induced osteonecrosis of the jaw found that these patients were treated with zoledronate pamidronate or a combination of these drugs which are commonly used for treating breast cancer or myeloma In about 5% of cases subjects with BIONJ were being treated for osteoporosis Precipitating events that contribute to BIONJ are tooth extractions about 50% of cases mandibular exostoses periodontal disease and local trauma from ill fitting dentures It is not known if the placement of dental implants is a precipitating factor The book aims to meet the need of medical practitioners working in all fields that use bisphosphonates and to present the conservative and surgical treatment methods currently in use There will also be detailed information on the literature relating to dental implants in patients treated with bisphosphonates Oxford Desk Reference: Obstetrics and Gynaecology Sabaratnam Arulkumaran, 2011-06-23 A concise evidence based textbook collating the key recommendations that practising obstetricians and gynaecologists need to know The easily accessible format allows for quick consultation whilst in the clinic or on the ward *Ethics and Intersex* Sharon E. Sytsma, 2006-06-07 This collection of 21 articles is designed to serve as a state of the art reference book for intersexuals their parents health care professionals ethics committee members and anyone interested in problems associated with intersexuality It fills an important need because of its uniqueness as an interdisciplinary effort bringing together not just urologists and endocrinologists but gynecologists psychiatrists psychologists lawyers theologians gender theorists medical historians and philosophers Most contributors are well known experts on intersexuality in their respective fields The book is also unique in that it is also an international effort including authors from England the Netherlands Germany Australia India Canada and the United States The book begins with introductory chapters on the etiology of intersex conditions conceptual clarification legal issues and reflections about the inherent characteristics of medical care that have led up to the issues we face today and explain the resistance to change in traditional practices Researchers provide recent data on gender identity surgical outcomes and appropriate clinical care Issues never having been addressed are introduced The significance of intersexuality for Christianity and for philosophical concerns with authenticity add further depth to the collection The final chapters deal with future possibilities in the treatment of intersex and for intersex advocacy Inconceivable Conceptions Jane Haynes, Juliet Miller, 2004-03 It is over two decades since the first test tube baby was born During this period a new belief that all infertile women can now have babies has become widely accepted indeed infertile couples may feel great pressure to

seek a medical solution However the psychological and social effects of the changing experiences of infertility remain confusing both for those who experience infertility and for wider society In this book a distinguished range of contributors including novelist Hilary Mantel and Germaine Greer examine the experience of infertility from both male and female perspectives the psychological aspects of infertility diagnosis and treatment and the often radical and unexpected effects on kinship Drawing from a wide range of theoretical backgrounds including Jungian analytical and compelling personal reflections this book aims to unravel the implications of advancing reproductive technology for our understanding of ourselves and our families

The Psychological Processes of Childbearing Joan Raphael-Leff, 2018-05-03 Childbearing seems eternal primordial and universal Yet human reproduction in the 21st century is in a state of flux This accessible book highlights dramatic changes that have occurred over the last decades focusing on both individual and cross cultural diversity across the now elongated childbearing cycle and the uniqueness of desire and emotional experience It does so by locating the transition to parenthood in its psycho sexual and socio economic context emphasising interweaving internal external realities and our inherent interconnectedness with others Included are conscious and unconscious factors determining beliefs expectations and parenting practices and ways in which these are affected by rapid urbanisation shrinking families societal instability HIV governmental maternity and child care policies and attitudes of professionals Drawing widely on empirical and clinical research from disparate disciplines psychoanalytic neuro scientific neonatal sociological obstetric anthropological and midwifery this resource book synthesises these to illustrate a spectrum of processes affecting each person s mental health

Primary Ovarian Insufficiency Nanette F. Santoro, Amber R. Cooper, 2016-02-09 Presenting the most current and relevant information on the diagnosis and management of primary ovarian insufficiency also known as premature ovarian failure POI POF this book presents two equally important voices The first is the scientific evidence based voice discussing the latest information on POI POF in a concise and logical fashion etiologies symptoms genetics mechanisms associated conditions as well as psychological and lifestyle considerations The second voice presents the first person stories of affected women who are often faced with a diagnosis of irreversible infertility at a very young age and who somehow learn to live with great uncertainty about their ability to create a family a core identity issue for many women It is thus not simply a clinical case based presentation but a more collaborative effort between clinicians who are well versed in the field and women who have POI POF

Primary Ovarian Insufficiency A Clinical Guide to Early Menopause will therefore be an excellent practical yet personal reference for OB GYNs reproductive medicine specialists and any clinician nurse or health care worker treating women living with POI POF

Assisted Human Reproduction Dani Singer, Myra Hunter, 2006-02-22 With contributions from Eric Blyth Ken Daniels Julia Feast Robert Lee Nina Martin Alexina McWhinnie Derek Morgan Clare Murray Sharon Pettle Claire Potter Jim Richards and Francoise Shenfield The separation of procreation from conception has broadened notions of parenthood and created novel dilemmas A woman may carry a foetus derived from gametes neither or only one of

which came from her or her partner or she may carry a foetus created using in vitro fertilisation IVF with the purpose of handing it to two other parents one neither or both of whom may be genetically related to the prospective child Parents may consist of single sex couples only one of them genetically related to the child the prospective mother may be past her menopause and genetic parenthood after death is now achievable In a world increasingly reliant on medical science how can the argument that equates traditional with natural and novel with unnatural unethical be justified Should there be legislation which is notoriously slow to change in a field driven by dazzling new possibilities at ever faster rate particularly when restrictions differ from country to country so that those who can afford it travel elsewhere for their treatment of choice Whose rights are paramount the adults hoping to build a family or the prospective child ren s future well being On what basis can apparently competing rights be regulated or adjudicated and how and to what extent can these be enforced in practice
