Principles And Techniques Of Mental Health Consultation Current Topics In Mental Health:

Principles and Techniques of Mental Health Consultation Stanley Plog, 2013-03-08 The raison d'être of the mental health profession is supposed to be concerned with helping. Our involvement is with people's problems, the psychological problems that incapacitate and prevent otherwise capable individuals from leading fulfilling and self-actualized lives. Perhaps more than most of the specialties and subdisciplines within the broad field, mental health consultation is even more concerned with helping people. Because the focus in consultation is on reaching larger numbers of people, the discipline has an even greater dedication to doing something about troubled lives. The emphasis of most consultations is on improving the quality of life for various groups of people, on making impossible living situations more bearable, and broadly on assisting people to face the daily challenges in their lives. Mental health consultation is an effective tool for achieving these goals (see Chapter 4). And it is an art, a difficult art that requires not only special skills and special training but special kinds of personalities that can relate well to people of different walks of life, different ethnic backgrounds, different religious or political beliefs, and different status or economic position. But unfortunately, far too many individuals who are engaged in consultation have neither the requisite background nor the special skills to become the kind of artist that is required.

Current Topics in Clinical and Community Psychology Charles D. Spielberger, 2013-10-22 *Current Topics in Clinical and Community Psychology* Volume 1 reviews advances in clinical and community psychology. Topics covered include theory and research in areas such as psychological assessment of intelligence, personality, and abnormal behavior; psychotherapy, broadly defined to include counseling and behavior modification; and psychophysiological and neurological determinants of personality and psychopathology. Comprised of five chapters, this volume first illustrates how reinforcement and modeling techniques can enable psychologists to function effectively as mental health consultants and agents of social change in an institution for delinquent children. The second chapter describes a unique program designed to prevent emotional dysfunction in school children by combining effective therapeutic intervention with relevant research and evaluation. The third chapter challenges the relevance of psychological research that does not take into account the relationship between the experimenter and his subjects and instead demonstrates the impact of experimenter self-disclosure on the responses given to psychological tests and on subjects' behavior in psychology experiments. The fourth chapter proposes a behaviorally oriented model for the assessment of positive mental health and describes a successful application of this model in the assessment of the competence of college freshmen. The final chapter relates research on human psychophysiology to problems of psychological assessment and psychotherapy that are of central concern to clinical psychologists. This book should prove useful to practicing clinical and community psychologists, graduate and undergraduate students of psychology, and members of other mental health professions.

Uprooting and Development George V. Coelho, 2013-04-17 Uprooting has to do with one of the

fundamental properties of human life the need to change and with the personal and societal mechanisms for dealing with that need As with the more general problems of change uprooting can be a time of human disaster and desolation or a time of adaptation and growth into new capacities The special quality of uprooting is that the need to change is faced at a time of separation from accustomed social cultural and environmental support systems It is this separation from familiar supports that either renders the uprooted vulnerable to the destructive consequences of change or creates freedoms for their evolution into new and constructive patterns of life Whether the outcomes will be destructive or constructive will be determined by the forces at work the nature and power of the uprooting forces versus the personal and societal capacities for coping with them Uprooting events are so widespread as to be compared with the major rites of life but with the difference that dislocation is involved Uprooting reaches from self imposed movements such as rural to urban migration running away and traveling abroad for schooling to natural and man made disasters such as earthquakes political oppression and war The impacts vary from the need to adapt to a new culture for an interim period of study to the desolating consequences of the total loss of family friends home and country

Medical and Health Care Books and Serials in Print ,1986 Coping with Physical Illness Rudolf Moos,2012-12-06 This book discusses how human beings cope with serious physical illness and injury A conceptual model for understanding the process of coping with the crisis of illness is provided and basic adaptive tasks and types of coping skills are identified The major portion of the book is organized around various types of physical illness These physical illnesses which almost all people face either in themselves or their family members raise common relevant coping issues The last few sections cover the crisis of treatment emphasizing the importance of unusual hospital environments and radical new medical treatments of stresses on professional staff and of issues related to death and the fear of dying The material highlights the fact that people can successfully cope with life crises such as major illness and injury rather than the fact that severe symptoms and or breakdowns sometimes occur The importance of support from professional care givers such as physicians nurses and social workers and from family friends and other sources of help in the community is emphasized Many of the selections include case examples which serve to illustrate the material Coping with Physical Illness has been broadly conceived to meet the needs of a diverse audience There is substantial information about how human beings cope with illness and physical disability but this material has never been collected in one place
