Principles For Determining The Air Force Active Reserve Mix:

Principles for Determining the Air Force Active/Reserve Mix, 1999 What should Air Force decisionmakers consider when making force mix deliberations across each element of the total force active Air Force Reserve AFR and the Air National Guard ANG Generally rational deliberations of force mix decisions have focused on three factors cost military effectiveness and availability However these three factors may not be the only considerations that should apply in determining an appropriate force mix There is also the issue understood but often intangible of how reserve forces help to meet certain social and political objectives important to the Air Force and Department of Defense DoD and how the reserve component RC captures valuable experience and expertise that would otherwise be lost In addition it is necessary to understand why the flow of human capital from active to reserve forces must be kept within feasible bounds Finally it is important to understand cost considerations in a disaggregated way in other words does the type of mission the Air Force performs favor one component over the other
