Green Chemistry for Surface Coatings, Inks and Adhesives Rainer Höfer, Avtar Singh Matharu, Zhanrong Zhang, 2019-06-06 Many modern surface coatings and adhesives are derived from fossil feedstocks. With fossil fuels becoming more polluting and expensive to extract as supplies dwindle, industry is turning increasingly to nature-mimicking natural solutions using renewable raw materials and employing new technologies. Highlighting sustainable technologies and applications of renewable raw materials within the framework of green and sustainable chemistry, circular economy and resource efficiency, this book provides a cradle-to-cradle perspective. From potential feedstocks to recycling, reuse opportunities and the de-manufacture of adhesives and solvents, green chemistry principles are applied to all aspects of surface coating, printing adhesive and sealant manufacture. This book is ideal for students, researchers and industrialists working in green sustainable chemistry, industrial coatings, adhesives, inks and printing technologies. **Modern**

Technology of Printing & Writing Inks (with Formulae & Processes) 2nd Revised Edition NIIR Board of Consultants & Engineers, 2016-02-05 Ink is a liquid or paste that contains pigments or dyes and is used to colour a surface to produce an image, text or design. Ink is used for drawing or writing with a pen, brush or quill. Thicker inks in paste form are used extensively in letterpress and lithographic printing. Ink can be a complex medium composed of solvents, pigments, dyes, resins, lubricants, solubilizers, surfactants, particulate matter, fluorescent dyes, and other materials. The components of inks serve many purposes; the ink's carrier, colorants and other additives affect the flow and thickness of the ink and its appearance when dry. India is among the fast-growing printing and writing ink markets globally, spurred by the rapid expansion of the domestic print markets. Backed by a strong demand from key end-user segments such as package printing, newsprint publishing and other commercial printing, the printing ink market in India has registered strong growth over the years. The printing ink industry is fragmented with hundreds of manufacturers and a large number of players in the unorganised sector. The printing ink sector in India witnessed a growth of around 7.5% per annum during the past years. Printed packaging accounts for around 27% of the demand for printing inks in India, followed by newspapers at 20%. Commercial printing, promotional and printed advertising together account for around 19% of the demand. Other key end-user segments for printing inks include books and stationery. With the print sector forecast to grow at around 8% per annum in coming years, the printing ink segment is expected to grow strongly. This handbook is designed for use by everyone engaged in the printing and writing ink industry and the associated industries. It provides all the information required by the ink technician for the day-to-day formulation of inks. It supplies the details of the manufacturing methods, including large-scale production, and gives guidance on achieving quality assessment and total quality management specifications. The book also describes properties and uses of the raw materials used in the formulation of printing and writing inks. The major content of the book are the colour and colour matching raw materials, printing inks, ink formulations, applications, problems with writing inks, project profile, how to estimate order, handling ink testing of writing
