Workplace and executive training is a multi-billion dollar industry, and yet an enormous percentage of that budget is spent on programs that have never been rigorously examined to ensure that they are fit for purpose and deliver value for the money. If you're signing off on that budget or asking your people to spend time on training programs, shouldn't that concern you? Training accreditation offers vital quality assurance, ensures global consistency of results, and delivers accountability for learning and performance outcomes. Apart from delivering better results and greater ROI, organizations can differentiate themselves from their competitors in the employment marketplace by offering accredited proprietary training. After all, digital natives and indeed all of today's most talented potential employees expect and increasingly demand the high-quality, engaging, and transferable employee development that only accredited programs can deliver. Aligning with the standards set by the International Association of Continuing Education and Training (IACET), today's premier accreditation body for training programs, the authors offer principles for quality program structure, delivery, and improvement needed to achieve accreditation. They share practices used by high-quality training program managers today, covering business alignment and program administration, along with the planning, design, delivery, and evaluation of learning systems. **Subject Guide to Books in Print**, 1996 *Resources in Education*, 1998 **Documentation Abstracts**, 1991 *Mastering the Instructional Design Process* William J.
