**Gatekeeper** John F. Sullivan, 2007 John F Sullivan was a polygraph examiner with the CIA for thirty one years during which time he conducted more tests than anyone in the history of the CIA s program The lie detectors act as the Agency s gatekeepers preventing foreign agents unsuitable applicants and employees guilty of misconduct from penetrating or harming the Agency Here Sullivan describes his methods emphasizing the importance of psychology and the examiners skills in a successful polygraph program Sullivan acknowledges that using the polygraph effectively is an art as much as a science yet he convincingly argues that it remains a highly reliable screening device more successful and less costly than the other primary method background investigation In the thousands of tests that Sullivan conducted he discovered double agents applicants with criminal backgrounds and employee misconduct including compromising affairs and the mishandling of classified information But *Gatekeeper* is more than Sullivan s memoirs It is also a window to the often acrimonious and sometimes alarming internal politics of the CIA the turf wars over resources personnel and mandate the slow implementation of quality control the aversion to risk taking and the overzealous pursuit of disqualifying information In an age when the intelligence community s conduct is rightly being questioned Sullivan contributes a fascinating personal account of one of the Agency s many important tasks      *The safety of food imports* United States.
