Precautions Against Death Literature:

Sex and Death in Eighteenth-Century Literature Jolene Zigarovich, 2013-05-02 This book discusses sex and death in the eighteenth century an era that among other forms produced the Gothic novel commencing the prolific examination of the century's shifting attitudes toward death and uncovering literary moments in which sexuality and death often conjoined By bringing together various viewpoints and historical relations the volume contributes to an emerging field of study and provides new perspectives on the ways in which the century approached an increasingly modern sense of sexuality and mortality It not only provides part of the needed discussion of the relationship between sex death history and eighteenth century culture but is a forum in which the ideas of several well respected critics converge producing a breadth of knowledge and a diversity of perspectives and methodologies previously unseen As the contributors demonstrate eighteenth century anxieties over mortality the body the soul and the corpse inspired many writers of the time to both implicitly and explicitly embed mortality and sexuality within their works By depicting the necrophilic tendencies of libertines and rapacious villains the fetishizing of death and mourning by virtuous heroines or the fantasy of preserving the body these authors demonstrate not only the tragic results of sexual play but the persistent fantasy of necro erotica This book shows that within the eighteenth century culture of profound modern change underworkings of death and mourning are often eroticized that sex is often equated with death as punishment or loss of the self and that the sex death dialectic lies at the discursive center of normative conceptions of gender desire and social power

Death Representations in Literature Adriana Teodorescu, 2015-01-12 If the academic field of death studies is a prosperous one there still seems to be a level of mistrust concerning the capacity of literature to provide socially relevant information about death and to help improve the anthropological understanding of how culture is shaped by the human condition of mortality Furthermore the relationship between literature and death tends to be trivialized in the sense that death representations are interpreted in an over aestheticized manner As such this approach has a propensity to consider death in literature to be significant only for literary studies and gives rise to certain persistent clichés such as the power of literature to annihilate death This volume overcomes such stereotypes and reveals the great potential of literary studies to provide fresh and accurate ways of interrogating death as a steady and unavoidable human reality and as an ever continuing socio cultural construction The volume brings together researchers from various countries the USA the UK France Poland New Zealand Canada India Germany Greece and Romania with different academic backgrounds in fields as diverse as literature art history social studies criminology musicology and cultural studies and provides answers to questions such as What are the features of death representations in certain literary genres Is it possible to speak of an homogeneous vision of death in the case of some literary movements How do writers perceive imagine and describe their death through their personal diaries or how do they metabolize the death of the significant others through their writings To what extent does the literary representation of death refer to the extra fictional

socio historically constructed Death Is it moral to represent death in children s literature What are the differences and similarities between representing death in literature and death representations in other connected fields Are metaphors and literary representations of death forms of death denial or on the contrary a more insightful way of capturing the meaning of death *Literary Digest* ,1906 **A History of Canadian Literature** W.H. continually speak to the period's rising funeral and mourning culture as well as the increasing commodification of death and mourning typically associated with nineteenth century practices. Drawing on a variety of historical discourses such as wills, undertaking histories, medical treatises and textbooks, anatomical studies, philosophical treatises and religious tracts and sermons, the book contributes to a fuller understanding of the history of death in the Enlightenment and its narrative transformation. *Death and the Body in the Eighteenth Century Novel* not only offers new insights about the effect of a growing secularization and commodification of death on the culture and its productions but also fills critical gaps in the history of death using narrative as a distinct literary marker. As anatomists dissected undertakers, preserved jewelers encased and artists figured the corpse, so too the novelist portrayed bodily artifacts. Why are these morbid forms of materiality entombed in the novel? Jolene Zigarovich addresses this complex question by claiming that the body itself, its parts or its preserved representation functioned as secular memento, suggesting that preserved remains became symbols of individuality and subjectivity. To support the conception that in this period notions of self and knowing center upon theories of the tactile and material, the chapters are organized around sensory conceptions and bodily materials such as touch, preserved flesh, bowel, heart, wax, hair and bone. Including numerous visual examples, the book also argues that the relic represents the slippage between corpse and treasure, sentimentality and materialism, and corporeal fetish and aesthetic accessory. Zigarovich's analysis compels us to reassess the eighteenth century response to and representation of the dead and dead like body and its material purpose and use in fiction. In a broader framework, *Death and the Body in the Eighteenth Century Novel* also narrates a history of the novel that speaks to the cultural formation of modern individualism.
