*Pregnancy & Childcare Issues in the Workplace* Gerard P. Panaro, 1987      Women in the workplace Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, 2013-06-20 Employees should be entitled to ask for flexible working from the outset not only after they have been in a job for six months says the Report Additionally the Government should establish a voluntary Code of Practice to highlight best practice in the provision of quality part time and flexible working and must dispel the myth that any type of flexible working is problematic and cannot work The Report also urges the Government to reconsider its decisions to introduce fees for pregnancy discrimination cases and to call time on the undertaking of Equality Impact Assessments It further recommends that the questionnaire procedures in discrimination cases and the Public Sector Equality Duty should be retained in their current forms The Committee notes that Government policy in these areas runs counter to its professed commitment to equality

**Working Women and their Rights in the Workplace** Naeima Faraj A.A. Al-Hadad, 2016-03-09 This book addresses women's rights to work and motherhood in Libya from a legal and international human rights perspective In an attempt to solve the problem posed by the perception that there is an unsolvable conflict between the right of women to work and their right to motherhood the author considers how these two sets of rights as protected under international human rights law can and should be recognised and promoted within the Libyan legal system Including first hand accounts of experiences of Libyan women the study voices their struggle for their rights as guaranteed by domestic law international conventions and Islam Providing a rare insight into a region striving to find its new identity the author assesses the adequacy of existing Libyan laws and where warranted offers proposals for legislative amendments to Libyan policy makers and its new Parliament at such a crucial time in the nation's history

*Childbearing and Careers of Japanese Women Born in the 1960s* Yukiko Senda, 2015-05-11 This book provides the keys to understanding the trajectory that Japanese society has followed toward its lowest low fertility since the 1980s The characteristics of the life course of women born in the 1960s who were the first cohort to enter that trajectory are explored by using both qualitative and quantitative data analyses Among the many books explaining the decline in fertility this book is unique in four ways First it describes in detail the reality of factors concerning the fertility decline in Japan Second the book uses both qualitative and quantitative methods to introduce the whole picture of how the low fertility trend began in the 1980s and developed in the 1990s and thereafter Third the focus is on a specific birth cohort because their experiences determined the current patterns of family formation such as late marriage and postponed childbirth Fourth the book explores the knife edge balance between work and family conditions especially with regard to childbearing in the context of Japanese management and gender norms After examining the characteristics of demographic and socioeconomic circumstances of postwar Japan in detail it can be seen that the change in family formation first occurred drastically in the 1960s cohort Using both qualitative interview data cumulatively from 150 people and quantitative estimates with official statistics this book

shows how individual level choices to balance work and family obligations resulted in a national level fertility decline Another focus of this book is the increasing unintended infertility due to postponed pregnancy a phenomenon that is attracting great social attention because the average age of pregnancy is approaching the biological limit This book is a valuable resource for researchers who are interested in the rapid fertility decline as well as the work life balance and the life course of women in Japanese employment practice and family traditions
