Denis Diderot,Walter Edwin REX,Richard Narum SCHWAB,1972* [Rethinking the Enlightenment](#) Henry Martyn Lloyd,Geoff Boucher,2017-12-29 One of the most persistent troubling and divisive of the ideological divisions within modernity is the struggle over the Enlightenment and its legacy Much of the difficulty is owed to a general failure among scholars to consider how history philosophy and politics work together Rethinking the Enlightenment bridges these disciplinary divides Recent work by historians has now called into question many of the clichés that still dominate scholarly understandings of the Enlightenment's literary philosophical and political culture Yet this work has so far had little impact on the reception of the Enlightenment its key players debates and ideas in the disciplines that most rely on its legacy namely philosophy and political science Edited by Geoff Boucher and Henry Martyn Lloyd Rethinking the Enlightenment makes the case for connecting new work in intellectual history with fresh understandings of Continental philosophy and political theory In doing so in this collection moves towards a critical self understanding of the present [Cosmopolitanism and the Enlightenment](#) Joan-Pau Rubiés,Neil Safier,2023-03-23 Offers a timely intervention into the debate about the Enlightenment and its legacy highlighting both its plurality and continuing relevance **The Culture of Diagram** John Bender,Michael Marrinan,2010-01-20 This book defines diagrams as tools manipulated by users to produce new kinds of understanding and demonstrates that a modern diagrammatic knowledge emerged in eighteenth century visual culture to become the foundation of later nineteenth century science [To the Uttermost Parts of the Earth](#) Martti Koskenniemi,2021-08-26 A critical history of European sovereignty and property rights

as the foundation of the international order in 1300 1870 **Duel at Dawn** Amir Alexander,2011-10-15 In the fog of a Paris dawn in 1832 variste Galois the 20 year old founder of modern algebra was shot and killed in a duel That gunshot suggests Amir Alexander marked the end of one era in mathematics and the beginning of another Arguing that not even the purest mathematics can be separated from its cultural background Alexander shows how popular stories about mathematicians are really morality tales about their craft as it relates to the world In the eighteenth century Alexander says mathematicians were idealized as child like eternally curious and uniquely suited to reveal the hidden harmonies of the world But in the nineteenth century brilliant mathematicians like Galois became Romantic heroes like poets artists and musicians The ideal mathematician was now an alienated loner driven to despondency by an uncomprehending world A field that had been focused on the natural world now sought to create its own reality Higher mathematics became a world unto itself pure and governed solely by the laws of reason In this strikingly original book that takes us from Paris to St Petersburg Norway to Transylvania Alexander introduces us to national heroes and outcasts innocents swindlers and martyrs all uncommonly gifted creators of modern mathematics

The Enlightenment J. C. D. Clark,2024-07-10 Enlightenment studies are currently in a state of flux with unresolved arguments among its adherents about its dates its locations and the contents of the movement This book cuts the Gordian knot There are many books claiming to explain the Enlightenment but most assume that it was a thing J C D Clark shows what it actually was namely a historiographical concept Currently the Enlightenment is a term widely accepted across popular culture and in a variety of academic disciplines notably history philosophy political theory political science literary studies and theology Clark calls for a fundamental reconsideration in each The Enlightenment An Idea and Its History provides a critical historical analysis of the Enlightenment in England Scotland France Germany and the United States from c 1650 to the present It argues that the degree of commonality between social and intellectual movements in each and more broadly between the five societies has been overstated for polemical purposes Clark shows that the concept of the Enlightenment was not widely adopted in those societies until the mid twentieth century indeed that it was unknown in the eighteenth Without the concept people at the time were unable to act in ways that would have created the Enlightenment as a coherent movement Since the conventional account has held that the Enlightenment was a phenomenon the idea could be used as a component of what has been called a civil religion a summing up of the myths of origin aims and essential values of a society from which dissent is not permitted An appreciation that it was instead a historiographical concept undermines in turn the idea that there was any great transition to what came to be called modernity

Systems Failure Andrew Franta,2019-04-16 How eighteenth century writers stretched systems designed to explain social relations to their breaking point showing the flaws in their design The Enlightenment has long been understood and often understood itself as an age of systems In 1759 Jean Le Rond d Alembert one of the architects of the Encyclop die claimed that the true system of the world has been recognized developed and perfected In Systems Failure Andrew Franta challenges this view by

exploring the fascination with failure and obsession with unpredictable social forces in a range of English authors from Samuel Johnson to Jane Austen Franta argues that attempts to extend the Enlightenment's systematic spirit to the social world prompted many prominent authors to reject the idea that knowledge is synonymous with system In readings of texts ranging from novels by Sterne Smollett Godwin and Austen to Johnson's literary biographies and De Quincey's periodical essays Franta shows how writers repeatedly take up civil and cultural institutions designed to rationalize society only to reveal the weaknesses that inevitably undermine their organizational and explanatory power Diverging from influential accounts of the rise of the novel *Systems Failure* audaciously reveals that in addition to representing individual experience and social reality the novel was also a vehicle for thinking about how the social world resists attempts to explain or comprehend it Franta contends that to appreciate the power of systems in the literature of the long eighteenth century we must pay attention to how often they fail and how many of them are created for the express purpose of failing In this unraveling literature arrives at its most penetrating insights about the structure of social life

The Mantle of the Earth Veronica della Dora, 2021-01-18 The term mantle has inspired philosophers geographers and theologians and shaped artists and mapmakers visual vocabularies for thousands of years According to Veronica della Dora mantle is the metaphor par excellence for it unfolds between the seen and the unseen as a threshold and as a point of tension Featuring numerous illustrations *The Mantle of the Earth: Genealogies of a Geographical Metaphor* is an intellectual history of the term mantle and its metaphorical representation in art and literature geography and cartography Through the history of this metaphor from antiquity to the modern day we learn about shifting perceptions and representations of global space about our planetary condition and about the nature of geography itself

(Re-)Writing the Radical Maike Oergel, 2012-12-19 The essays in this volume discuss the overlap between philosophical aesthetic and political concerns in the 1790s either in the work of individuals or in the transfer of cultural materials across national borders which tended to entail adaptation and transformation What emerges is a clearer understanding of the fate of the Enlightenment its radicalization and its overcoming in aesthetic and political terms and of the way in which political paranoia generated by the fear of a spreading revolutionary radicalism facilitated and influenced the cultural transfer of the radical The collection will be of interest to scholars in French German English and comparative studies working on the later 18th century or early 19th century It is of particular interest to those working on the impact of the French Revolution those engaged in reception studies and those researching the interface between political and cultural activities It is also of key interest to intellectual historians of this period as well as general historians with an interest in modern conservatism and radicalism

The Palgrave Handbook of Gothic Origins Clive Bloom, 2022-01-01 This handbook provides a comprehensive overview of research on the Gothic Revival The Gothic Revival was based on emotion rather than reason and when Horace Walpole created Strawberry Hill House a gleaming white castle on the banks of the Thames he had to create new words to describe the experience of gothic

lifestyle Nevertheless Walpole's house produced nightmares and his book *The Castle of Otranto* was the first truly gothic novel with supernatural sensational and Shakespearean elements challenging the emergent fiction of social relationships The novel's themes of violence tragedy death imprisonment castle battlements dungeons fair maidens secrets ghosts and prophecies led to a new genre encompassing prose theatre poetry and painting whilst opening up a whole world of imagination for entrepreneurial female writers such as Mary Shelley Joanna Baillie and Ann Radcliffe whose immensely popular books led to the intense inner landscapes of the Brontë sisters Matthew Lewis's *The Monk* created a new gothic atheistic decadent perverse necrophilic and hellish The social upheaval of the French Revolution and the emergence of the Romantic movement with its more intense and often atheistic self-absorption led the gothic into darker corners of human experience with a greater emphasis on the inner life hallucination delusion drug addiction mental instability perversion and death and the emerging science of psychology The intensity of the German experience led to an emphasis on doubles and schizophrenic behaviour ghosts spirits mesmerism the occult and hell This volume charts the origins of this major shift in social perceptions and completes a trilogy of Palgrave Handbooks on the Gothic combined they provide an exhaustive survey of current research in Gothic studies a go-to for students and researchers alike

British Philosophy and the Age of Enlightenment Stuart Brown, 2012-12-06 This fifth volume covers many of the most important philosophers and movements of the nineteenth century including utilitarianism positivism and pragmatism

Encyclopaedic Visions Richard Yeo, 2001-03-29 The eighteenth century English dictionaries of arts and sciences claimed to contain all knowledge that a person of education should possess These early encyclopaedias responded to the explosion of information by reducing knowledge to essentials stressing the need for a coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written *Encyclopaedic Visions* provides a major contribution to Enlightenment studies and the history of ideas in general

Living Words Terence J. Martin, 1998 In particular Martin commends the habit of critical thinking an appreciation for irony and an irenic approach to opposition as helpful stances for improving people's efforts to talk about religion In addressing rhetorical and hermeneutical issues commonly found in philosophical theology and the philosophy of religion this work's approach through the genre of dialogue will interest those concerned with the intersection of religion and literature
