Immunopharmacology Jürgen Drews, 2012-12-06 Immunopharmacology is defined as that part of pharmacology that deals with drugs acting on the immune system and in addition with the pharmacological actions of substances derived from the immune system In order to lend sharper definition to the term immunopharmacology the subject matter has been divided according to clinical and pragmatic criteria The division into immunosubstitution immunosuppression antiallergic substances and immunostimulation gives the heterogeneous material a tighter structure than would any classification according to origin chemical structure or mechanism of action

Hadden,L. Chedid,P. Mullen,2016-04-19

Advances in Immunopharmacology documents the proceedings of the First International Conference on Immunopharmacology held in Brighton England in July 1980 The volume contains 60 papers organized into 10 parts The papers in Part I examine the pharmacology of immunotherapeutic drugs and immunotoxicology Part II presents studies on thymic hormones Part III is devoted to immunopharmacologic approaches to diseases other than cancer Part IV deals with mechanisms of chemotaxis degranulation and microbicidal action Part V focuses on cancer immunopharmacology and immunotherapy while Part VI covers the mechanisms of inflammatory and allergic processes Part VII takes up the immune testing of the actions of immunotherapeutic agents Part VIII discusses prostaglandins and macrophage suppression Part IX is devoted to selected topics such as mechanism of action of soluble immune response suppressor and new approaches to the therapy of allergic diseases Part X presents discussions during the therapy communication sessions *Goth's Medical Pharmacology* Andres Goth,Wesley G. Clark,D. Craig Brater,Alice R. Johnson,1988 **Principles and Practice of Geriatric Surgery** Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients This is a useful book that deserves to do well I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field NEJM Book Review **Principles of Cancer Biotherapy** R.K. Oldham,2012-12-06 At the time of the first edition of *Principles of Cancer Biotherapy* this book represented the first comprehensive textbook on biological therapy Whereas in 1991 when the second edition was published there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies Cancer biotherapy has truly matured into the fourth modality of cancer treatment The third edition is now needed as a result of the tremendous progress that has been made in recent years using biologicals in cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future

opportunity but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy
