Effective Policing? S. Kirby, 2013-09-20 This book provides a unique insight into the way policing is performed. By embracing both organizational management issues as well as operational police business such as crime reduction and detection, firearms, disorder, organised crime, and terrorism, it provides a comprehensive overview of contemporary police theory and practice.

Police and Human Rights Ralph Crawshaw, 1999-05 This book is a teaching resource written by a former senior police officer now working in the field of human rights and policing as a contribution to the realisable ideal of securing respect for and protection of human rights by and through effective policing. It is a Teaching Manual designed to enable educators and trainers of police to conduct human rights seminars and workshops for police or to enable them to incorporate human rights into police academy programmes. The Manual provides a concise account of international human rights standards relevant to the exercise of police powers, to the performance of police functions, and to police leadership and training. Chapters on the professional context, the international context, and the democratic context within which policing is practised provide a framework for this account. The content and format of the Manual are based on best practice developed by the author when delivering human rights programmes for police initiated and organised in a variety of countries by the Raoul Wallenberg Institute of Human Rights and Humanitarian Law. The long-term nature of these programmes means that it has been possible to develop and refine teaching methods and material which have been incorporated in the Manual.

Democratic Policing in Transitional and Developing Countries Michael D. Wiatrowski, 2016-05-13 Is it possible to create democratic forms of policing in transitional and developing societies? This volume argues that policing models and practices promoted by the west are often inadequate for adoption by countries making democratic transitions because they do not adequately address issues such as human rights, equity, co-production, accountability, openness, and organizational change. Therefore, police reform is often limited to a one-size

fits all approach The book expands the dialogue so that discussions of democratic policing around the world are more realistic comprehensive and sensitive to the local context Detailed case studies on Iraq South Africa Northern Ireland and Kazakhstan provide a realistic assessment of the current state of policing The editors use the studies to suggest how to promote democratic policing and other important goals of democratic reform around the world The volume will assist academics policy makers NGOs and others in tailoring a local democratic policing strategy within a broader framework to enhance socioeconomic development and citizen capacity build social capital reduce various forms of conflict and support human rights
