Plastic Glasses and Church Fathers David Kronenfeld, 1996-04-11 Meaning seems to shift from context to context how do we know when someone says grab a chair that an ottoman or orange crate will do but when someone says let's buy a chair they won't. Somehow in spite of this slipperiness we usually understand each other in conversations and have straightforward ways of querying each other when we sense a gap in understanding. We seem capable of using ordinary language to communicate with as much precision as we are willing to take the time and effort for through attention to interactive feedback and the use of paraphrastic modification, specification and explication. In *Plastic Glasses and Church Fathers* Kronenfeld offers a theory that explains both the usefulness of language's variability of reference and the mechanisms which enable us to understand each other in spite of the variability. His theory is rooted in the tradition of ethnoscience or cognitive anthropology, a tradition which promotes an ethnography of explicit methodology and mathematically precise theory while remaining responsive to the complexity of particular cultures. Kronenfeld accomplishes three things with his theory. First he distinguishes prototypic referents from extended referents. Second he describes the various bases of semantic extensions. Finally he details how we use the situational context of usage, the linguistic context of opposition and inclusion and the conceptual context of knowledge about the world to interpret communicative events.

Bulletin, 1904 **An Optimum Organizational Structure for a Large Earth-orbiting Multidisciplinary Space Base** James M. Ragusa, 1975 **A Grammar of Semelai** Nicole Kruspe, 2004-04-08 Semelai is a previously undescribed and endangered Aslian Mon-Khmer language of the Malay Peninsula. This book, the first in-depth description of an Aslian language, provides a comprehensive reference grammar of Semelai. Semelai intertwines two types of morphological system: a concatenative system of prefixes, suffixes and a circumfix acquired through extended contact with Malay and a nonconcatenative system of prefixes and infixes including infix reduplication inherited from Mon-Khmer. There are distinctive word classes: Nominals, Verbs and Expressives; the latter iconic utterances which simultaneously provide information about the predicate and its arguments. Semelai has many derivational processes which change word class or affect transitivity and it combines both head marking and dependent marking profiles. It also has a rich phonemic system of 20 vowels and 32 consonants. Nicole Kruspe's discussion is complemented with a generous number of illustrative examples and texts creating a reference work that will be welcomed by descriptivists and typologists alike.
