M. Mody,2016-12-09 How beginning in the mid 1960s the US semiconductor industry helped shape changes in American science including a new orientation to the short term and the commercial Since the mid 1960s American science has undergone significant changes in the way it is organized

funded and practiced These changes include the decline of basic research by corporations a new orientation toward the short term and the commercial with pressure on universities and government labs to participate in the market and the promotion of interdisciplinarity In this book Cyrus Mody argues that the changes in American science that began in the 1960s co evolved with and were shaped by the needs of the civilianized US semiconductor industry In 1965 Gordon Moore declared that the most profitable number of circuit components that can be crammed on a single silicon chip doubles every year Mody views Moore s Law less as prediction than as self fulfilling prophecy pointing to the enormous investments of capital people and institutions the semiconductor industry required the long arm of Moore s Law that helped shape all of science Mody offers a series of case studies in microelectronics that illustrate the reach of Moore s Law He describes the pressures on Stanford University s electrical engineers during the Vietnam era IBM s exploration of alternatives to semiconductor technology the emergence of consortia to integrate research across disciplines and universities and the interwoven development of the the molecular electronics community and associated academic institutions as the vision of a molecular computer informed the restructuring of research programs

Grit and Gold Jean Johnson,2018-11-01 No other Western settlement story is more famous than the Donner Party s ill fated journey through the Sierra Nevada Mountains But a few years later and several hundred miles south another group faced a similar situation just as perilous Scrupulously researched and documented Grit and Gold tells the story of the Death Valley Jayhawkers of 1849 and the young men who traveled by wagon and foot from Iowa to the California gold rush The Jayhawkers journey took them through the then uncharted and unnamed hottest driest lowest spot in the continent now aptly known as Death Valley After leaving Salt Lake City to break a road south to the Pacific Coast that would eliminate crossing the snowy Sierra Nevada the party veered off the Old Spanish Trail in southern Utah to follow a mountaineer s map portraying a bogus trail that claimed to cut months and hundreds of miles off their route to the gold country With winter coming however they found themselves hopelessly lost in the mountains and dry valleys of southern Nevada and California Abandoning everything but the shirts on their backs and the few oxen that became their pitiful meals they turned their dreams of gold to hopes of survival Utilizing William Lorton s 1849 diary of the trek from Illinois to southern Utah the reminiscences of the Jayhawkers themselves the keen memory of famed pioneer William Lewis Manly and the almost daily diary of Sheldon Young Johnson paints a lively but accurate portrait of guts grit and determination
