examination of W E B Du Bois's creative writing as the source of the first black academic novels Porter looks at the fictional representations of black intellectual life and the expectations that are placed on faculty and students to be racial representatives and spokespersons whether or not they ever intended to be The final chapter examines black academics on stage and screen including in the 2014 film *Dear White People* and the groundbreaking television series *A Different World*

Tapper, 2013-10-18 Examining how Crane's corporeal aesthetic informs poems written across the span of his career *The Machine That Sings* focuses on four texts in which Crane's preoccupation with the body reaches its apogee Tapper treats *Voyages* *The Wine Merchant* and *Possessions* as a triptych of erotic poems in which Crane plays out alternative resolutions to the dialectic between purity and defilement a conceptual dynamic which Tapper argues is central to both Crane's poetics of difficulty and his representations of homosexual desire Tapper concentrates on the three sections of *The Bridge* most concerned with recuperating animality *National Winter Garden* *The Dance* and *Cape Hatteras* **Conversations with Samuel R. Delany** Samuel R. Delany, 2009 Interviews with the author of *Dhalgren* *Babel 17* *Stars in My Pocket like Grains of Sand* the *Nevryon* cycle and *Times Square* *Red Times Square* *Blue* **The Subject of Race in American Science Fiction** Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his *Mars* series Edgar Rice Burroughs

primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler s racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today

**The Individual and Utopia** Clint Jones,Cameron Ellis,2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual s relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world The Individual and Utopia enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature

research has uncovered a peculiar pattern race comes into sharp relief when computer use is depicted as difficult labor requiring special expertise Time and again in such scenarios the helpful person of color is there to take the call to provide technical support to deal with the machines In interpreting such images Color Monitors analyzes the computer fearing strain in American whiteness an aspect of white identity that defines itself against information technology and the racial other imagined to love it and excel at it Martin Kevorkian Following up on Ralph Ellison s intimation that blacks serve as the machines inside the machine Color Monitors examines the designation of black bodies as natural machines for the information age Martin Kevorkian shows how African Americans are consistently depicted as highly skilled intelligent and technologically savvy as they work to solve complex computer problems in popular movies corporate advertising and contemporary fiction But is this progress Or do such seemingly positive depictions have more disturbing implications Kevorkian provocatively asserts that whites historical fear of a black planet has in the age of microprocessing converged with a new fear of computers and the possibility that digital imperatives will engulf human creativity Analyzing escapist fantasies from Mission Impossible to Minority Report Kevorkian argues that the placement of a black man in front of a computer screen doubly reassures audiences he is nonthreatening safely occupied even imprisoned by the very machine he attempts to control an occupation that simultaneously frees the action heroes from any electronic headaches The study concludes with some alternatives to this scheme looking to a network of recent authors with shared affinities for Ellison and Pynchon willing to think inside the black box of technology Connecting race technology and American empire Color Monitors will attract attention from scholars working in emerging areas of race theory African American studies film studies cultural studies and technology and communication studies
