The book thus undertakes to invert the usual approach to the social sciences in which the research is required to be objective in terms of methodology and subjective with regard to evaluative claims Instead the authors are deliberately objective about values in order to be more open to the subjectivities of human life Happiness Flourishing and the Good Life thus seeks to move away from economic considerations domination of all social spaces in order to understand the possibilities of well being beyond instrumentalisation or commodification A radical new approach to the human well being this book will appeal to philosophers social theorists and political scientists and all who are interested in human happiness Foundations of Coopetition Strategy Anna Minà, Giovanni Battista Dagnino, 2021-12-30 This book disentangles the foundations of coopetition i e concurrent competition and cooperation by exploring in depth the intellectual legacy of Eastern and Western perspectives In particular it detects the foundations of coopetition in three Chinese streams of thought Confucianism Taoism and Legalism and in five Western schools of thought David Hume Adam Smith Immanuel Kant Georg Wilhelm Frederich Hegel and S ren Kierkegaard In such a way it unveils four logics used to tackle the essence of coopetition respectively either or both and both or and either and The key objectives of the book are firstly to adopt a paradoxical lens to investigate the foundations of coopetition strategy Secondly to offer an interpretive framework that detects the different forms tactics and patterns of coopetition Thirdly to discuss the implications of the framework proposed for other paradoxical strategies and to distil a bouquet of managerial implications In such a way the volume combines existing foundational perspectives with a contemporary interpretation of the coopetition phenomenon thereby offering a valuable understanding of the current business and management world The guiding principles of the book enable readers to extricate the dichotomy between the phenomenon of coopetition and coopetitive strategy appraise the rationale for distinguishing between deliberate planned coopetition strategy and emergent unplanned but conscious coopetition strategy and understand how to deal with coopetition tensions Consciousness, Awareness, and

Anesthesia George A. Mashour,2010-01-25 Hypnosis amnesia and immobility are three major therapeutic endpoints of general anesthesia In one to two cases out of a thousand hypnosis and amnesia are not achieved often leaving a patient immobile but capable of experiencing and remembering intraoperative events Awareness during general anesthesia is one of the most dreaded complications of surgery and is feared by patients and clinicians alike Despite many advances in the field there are also a number of unresolved questions that persist Some of the difficulties in the detection and prevention of awareness during anesthesia relate to the underlying complexities of the neuroscientific basis of consciousness Consciousness Awareness and Anesthesia is a multidisciplinary approach to both the scientific problem of consciousness and the clinical problem of awareness during general anesthesia An international cadre of authors with expertise in anesthesiology neurobiology and philosophy provides a cutting edge perspective No other book on the subject has drawn from such a breadth of scholarship
