Archi-Graphic Frank Jacobus,2015-10-27 This informative and engaging book uses a variety of inventive infographics to take an unusual look at architecture in a way that would not be possible with words and images alone Through a variety of different infographics it compares for example the range of materials and colours used by different architects the relative locations of their buildings who influenced who and which architects are the most discussed It also approaches architecture from more unconventional angles with spreads that show the kinds of architecture favoured by dictators the networks of love affairs that architects got entangled in the defining facial features of famous architects and so on Irreverent and entertaining this book will appeal to all those with an interest in architecture or infographics **Looking for Mies** Ricardo Daza,Ludwig Mies van der Rohe,2000-08 A man evidently the architect Mies van der Rohe stands in a room in a glass and steel building This is the scene that author Ricardo Daza uses for his investigation into the man the room the building and what the architect is looking at Looking for Mies unfolds like a detective novel complete with deductions revelations and conclusions about the architect s work This fascinating study of van der Rohe is illustrated with 160 duotones **The British Architect**

,1915 *Why Architecture Matters* Paul Goldberger,2009-11-03 Why Architecture Matters is not a work of architectural history or a guide to the styles or an architectural dictionary though it contains elements of all three The purpose of Why Architecture Matters is to come to grips with how things feel to us when we stand before them with how architecture affects us emotionally as well as intellectually with its impact on our lives Architecture begins to matter writes Paul Goldberger when it brings delight and sadness and perplexity and awe along with a roof over our heads He shows us how that works in examples ranging from a small Cape Cod cottage to the vast flowing Prairie houses of Frank Lloyd Wright from the Lincoln Memorial to the highly sculptural Guggenheim Bilbao and the Church of Sant Ivo in Rome where simple geometries create a work of architecture that embraces the deepest complexities of human imagination Based on decades of looking at buildings and thinking about how we experience them the distinguished critic raises our awareness of fundamental things like proportion scale space texture materials shapes light and memory Upon completing this remarkable architectural journey readers will enjoy a wonderfully rewarding new way of seeing and experiencing every aspect of the built world

Innovations in Hybrid Intelligent Systems Emilio Corchado,Juan Manuel Corchado Rodríguez,Ajith Abraham,2007-12-22 This carefully edited book combines symbolic and sub symbolic techniques to construct more robust and reliable problem solving models This volume focused on Hybrid Artificial Intelligence Systems contains a collection of papers that were

presented at the 2nd International Workshop on Hybrid Artificial Intelligence Systems held in 12-13 November 2007
Salamanca Spain **Architect Knows Best** Simon Richards, 2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius, Le Corbusier and Jos Luis Sert in the first half of the 20th century. Their proposals for functional zoning, multi-level transport, high-rise living and machine-inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged. It was thought that the environmental determinist strand of the discourse was killed off at this time as well. This book argues that it was not but on the contrary that it has deepened and diversified. Many of the most prominent architect-planners continue to design with a view to improving the behaviour of individual people and of society at large. By looking at and interviewing major figures and movements of recent years in Britain, Europe and America including Le Corbusier, Peter Eisenman, Andrés Duany, Jane Jacobs, Robert Venturi and Denise Scott Brown, it demonstrates the myriad ways that architect-planners seek to shape human behaviour through buildings. In doing so, the book raises awareness of this strand within the discourse and examines its different purposes and manifestations. It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase, discusses why it is seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding. Richards does not provide any simple solutions but in conclusion is critical of architect-planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings. Neo-liberalism and the Architecture of the Post Professional Era Hossein Sadri, 2018-04-27 This book discusses the effects of Neo Liberal policies on the transformations of architectural and urban practices and education in the transition from the era of professionalism to post professionalism. Building on previous literature in the field of contemporary theory of architecture, it provides the necessary resources for the study of contemporary architecture and urban politics, urban sociology, local administration and urban geography. Further, it develops a political and critical perspective on contemporary practices of architecture and urbanism, their implementation, legal background, political effects and social results. The book will interest readers from a wide range of academic disciplines from political science to architecture and from urban studies to sociology.
