*China's India War, 1962: Looking Back to See the Future* Air Commodore Jasjit Singh, 2013-03-15 A potential competition exists between India and China and there is also no doubt that China started the war Highlighting the mistakes made by India rather than empirically analysing the available data can be regarded as the primary causes for the confusion that exists today Though complete details and evidence of the developments are available and documented few of us have attempted to draw up a pragmatic and realist analysis The consequences of that war have yet to die down entirely and are frequently raked up with issues on recent developments which are not widely dissimilar to those of 1962 China is a complex country To understand this rapidly progressing nation is even more difficult There are many perceptions on this country and many of them are formed on account of some international events and China's growing assertiveness It may be far fetched to expect for a paradigm change in stance and motive which could give China an uncertain negotiating position This edited volume provides the reader an excellent blend of the historical run up to the aberration the military developments and consequences It also provides useful material to understand the geographical boundary issues between India and China and developing Chinese strategies both on the political and military front

**and Transcendence** G. Motzkin,2012-12-06 This book investigates one aspect of the story of how our religiously oriented culture became a secular one It concentrates on the conflicts enveloping the attitude to the past from the late seventeenth to the early twentieth century The background argument is that the way the process of secularization occurred in one particular

religious context the Roman Catholic one was determinative for the possibility of something such as secular culture and hence for both the modern secular attitude to the past and the modern religious one In recent years a spate of scholarship has suggested that the expanded version of Weber's theory according to which modernity is a consequence of Protestantism is not quite accurate Robert Merton modified this theory to argue that modern natural science originated in the context of seventeenth century Protestant England Against this position many scholars have investigated two origins for the development of science in Catholic countries The development of natural science however is not the whole story of the development of modern secular culture even if the story of that development is restricted to the development of knowledge Our modern universities are organized around the division between humanities and natural sciences and it can be thought that this process of modernization or secularization affected the humanities no less than the sciences

**Science Fiction and the Historical Novel** Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches *Science Fiction and the Historical Novel* asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present

Memorializing Violence Alison Crosby, Heather Evans, 2025-02-11 Memorializing Violence brings together feminist and queer reflections on the transnational lives of memorialization practices asking what it means to grapple with loss mourning grief and desires to collectively remember and commemorate as well as urges to forget in the face of disparate yet entangled experiences of racialized and gendered colonial imperial militarized and state violence The volume uses a transnational feminist approach to ask How do such efforts in seemingly unconnected remembrance landscapes speak to with and through each other in a world order inflected by colonial imperial and neoliberal logics structures and strictures How do these memorializing initiatives not only formulate within but move through complex transnational flows and circuits and what transpires as they do What does it mean to inhabit loss mourning resistance and refusal through memorialization at this moment and what s at stake in doing so What might transnational feminist analyses of gender race sexuality class and nation have to offer in this regard

Rubinfeld, 2008-10-01 Should we try to live in the present Such is the imperative of modernity Jed Rubinfeld writes in this important and original work of political theory Since Jefferson proclaimed that the earth belongs to the living since Freud announced that mental health requires people to get free of their past since Nietzsche declared that the happy man is the man who leaps into the moment modernity has directed its inhabitants to live in the present as if there alone could they find happiness authenticity and above all freedom But this imperative Rubinfeld argues rests on a profoundly inadequate deforming picture of the relationship between freedom and time Instead Rubinfeld suggests human freedom human being itself necessarily extends into both past and future self government consists of giving our lives meaning and purpose over time From this conception of self government Rubinfeld derives a new theory of constitutional law s place in democracy Democracy he writes is not a matter of governance by the present will of the people it is a matter of a nation s laying down and living up to enduring political and legal commitments Constitutionalism is not counter to democracy as many believe or a pre condition of democracy it is or should be democracy itself over time On this basis Rubinfeld offers a new understanding of constitutional interpretation and of the fundamental right of privacy
