Looking For Life In The Universe The Search For Extraterrestrial Intelligence:

Looking for Life in the Universe Ellen Jackson, 2002 Investigates how scientists particularly Jill Tarter Director of the SETI Institute in Mountain View California use twenty first century technology to investigate whether life exists on other planets

Searching for Extraterrestrial Intelligence H. Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led and continue to lead the scientific quest known as SETI the search for extraterrestrial intelligence Divided into three parts the first section The Spirit of SETI Past written by the surviving pioneers of this then emerging discipline reviews the major projects undertaken during the first 50 years of SETI science and the results of that research In the second section The Spirit of SETI Present the present day science and technology is discussed in detail providing the technical background to contemporary SETI instruments experiments and analytical techniques including the processing of the received signals to extract potential alien communications In the third and final section The Spirit of SETI Future the book looks ahead to the possible directions that SETI will take in the next 50 years addressing such important topics as interstellar message construction the risks and assumptions of interstellar communications when we might make contact what aliens might look like and what is likely to happen in the aftermath of such a contact

The Eerie Silence Paul Davies, 2010-04-02 Refreshing A penetrating analysis of the assumptions that underlie SETI and the entire enterprise of searching for life beyond Earth Chris McKay Nature Fifty years ago a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization Thus began one of the boldest scientific projects in history the Search for Extraterrestrial Intelligence SETI After a half century of scanning the skies however astronomers have little to report but an eerie silence eerie because many scientists are convinced that the universe is teeming with life Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post Detection Taskgroup charged with deciding what to do if we are suddenly confronted with evidence of alien intelligence He believes the search so far has fallen into an anthropocentric trap assuming that an alien species will look think and behave much like us In this provocative book Davies refocuses the search challenging existing ideas of what form an alien intelligence might take how it might try to communicate with us and how we should respond if it does Paul Davies gives us a panoramic view of the quickening search for cosmic company a fascinating tale stuffed with novel ideas about the nature of intelligence far beyond our own Seth Shostak Senior Astronomer SETI Institute An immensely readable investigation of the SETI enterprise A wonderful book New Scientist A far ranging look at what might happen here on Earth when we make first contact Highly recommended for both science fiction and astronomy buffs Publishers Weekly

The Search for Extraterrestrial Intelligence Thomas R. McDonough, 1987 In nontechnical language the author describes the projects and future possibilities in the search for extraterrestrial intelligence

Reinventing SETI John Gertz, 2025 Reinventing SETI clears out the cobwebs of outdated or wrongheaded SETI
