Carol Matas, 2022-04-12 In this delightfully original nonfiction picture book the readable text offers understandable science while the engaging illustrations promote careful investigation A valuable addition to science and nature collections Highly recommended School Library Journal starred review How do animals see the world It turns out very differently In this nonfiction picture book a young girl and her baby sister's outdoor adventure hiking through the forest picnicking in the grass and swimming in the ocean is overseen by the local fauna The way those animals view the girls is very different from how the girls see each other Goats see far and wide in a panorama whales don't see color the way humans do and a high soaring eagle's sharp vision can clearly see a tiny mouse far below Through clever illustrations and scientific prose we are reminded that while we may see things differently we all share this life together on planet Earth **Let's Look: Animals**
