Max Schlemmer Hawaii's King Of Laysan Island:

Max Schlemmer, Hawaii's King of Laysan Island Tom Unger, 2004-02 The tale of Max Schlemmer is powerful compelling non fiction Max is a renaissance man who survives the danger of whaling in the frigid North Pacific works on various Hawaiian sugar plantations captains sailing vessels pioneers the guano business on Laysan Island takes on the duties of mid wife is a Honolulu Police captain and a motorman with Honolulu Rapid Transit Co and always a man devoted to family and country Max is also an entrepreneur In his early years in Hawaii he gained squatter s rights to Laysan Island Later he established his home on this tiny distant and isolated island Though many business ventures failed he dreamed of a kingdom on Laysan Island Perhaps he dreamed and schemed also about the vast riches to be gained in the bird plumage trade Max Schlemmer Hawaii s King of Laysan Island takes place during an interesting period of Hawaiian history Max is involved in rioting which leads to the overthrow of the monarchy and to Hawaii becoming the Territory of Hawaii Max is a constant gadfly to the local authorities his actions often lead them into uncharted waters and reverberates finally in Washington D C Max Schlemmer Hawaii s King of Laysan Island is also the story of the life and death of an island Japan's Ocean

Borderlands Paul Kreitman, 2023-07-27 Desert islands are the focus of intense geopolitical tensions in East Asia today but they are also sites of nature conservation In this global environmental history Paul Kreitman shows how the politics of conservation have entangled with the politics of sovereignty since the emergence of the modern Japanese state in the mid nineteenth century Using case studies ranging from Hawai i to the Bonin Islands to the Senkaku Ch Diaoyu Isles to the South China Sea he explores how bird islands on the distant margins of the Japanese archipelago and beyond transformed from sites of resource extraction to outposts of empire and from wartime battlegrounds to nature reserves This study examines how interactions between birds bird products bureaucrats speculators sailors soldiers scientists and conservationists shaped ongoing claims to sovereignty over oceanic spaces It considers what the history of desert islands shows us about imperial and post imperial power the web of political economic and ecological connections between islands and oceans and about the relationship between sovereignty territory and environment in the modern world **Conservation of Marine Birds**

Lindsay Young, Eric VanderWerf, 2022-09-27 Conservation of Marine Birds is the first book to outline and synthesize the myriad of threats faced by one of the most imperiled groups of birds on earth With more than half of all 346 seabird species worldwide experiencing population declines and 29% of species recognized as globally threatened by the International Union for Conservation of Nature the timing to determine solutions to threats could not be more urgent Written by a diverse team of international experts on marine birds this book explores the environmental and biogeographical factors that influence seabird conservation and provides concrete recommendations for mounting climate change issues This book will be an important resource for researchers and conservationists as well as ecologists and students who want to understand seabirds the threats they are facing and tactics to help conserve and protect them Outlines both threats and solutions in the marine

and terrestrial realm Synthesizes information to provide a comprehensive strategy moving forward especially considering climate change Created by a team of experts with the latest and most comprehensive knowledge of seabird conservation

Ten Thousand Birds Tim Birkhead,Jo Wimpenny,Bob Montgomerie,2014-03-01 Ten Thousand Birds provides a thoroughly engaging and authoritative history of modern ornithology tracing how the study of birds has been shaped by a succession of visionary and often controversial personalities and by the unique social and scientific contexts in which these extraordinary individuals worked This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum based discipline focused almost exclusively on the anatomy taxonomy and classification of dead birds It describes how in the early 1900s pioneering individuals such as Erwin Stresemann Ernst Mayr and Julian Huxley recognized the importance of studying live birds in the field and how this shift thrust ornithology into the mainstream of the biological sciences The book tells the stories of eccentrics like Colonel Richard Meinertzhagen a pathological liar who stole specimens from museums and quite likely murdered his wife and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack Niko Tinbergen Robert MacArthur and others who through their studies of birds transformed entire fields of biology Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field Drawing on a wealth of archival material and in depth interviews this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms

Japanese Advance into the Pacific Ocean Akitoshi Hiraoka,2017-09-12 This book asserts that the albatross was the reason for the advance of the Japanese into the isolated islands in the Pacific after the abolition of the Japanese closed door policy that had been in effect from the seventeenth century to the latter part of the nineteenth century The birds plumage was of high quality and sold at quite a good price in Europe The Japanese realized the advantage of this global trade and their desire to capture albatross motivated them to advance into the Pacific The exploration of the uninhabited islands had become a fast moving trend defined by the author as the Bird Rush As a consequence the advance into the Pacific by the Japanese resulted in the expansion of Japanese territory The author has interpreted this Japanese movement into the Pacific by making use of the framework of three distinct shifts in the aim of their actions from birds to guano phosphate ore in the agents of action from individual speculators to commercial capital and then to monopolistic capital and from the sea near Japan to the wider Pacific This concept can be termed a view of history centered on the albatross

The Hat That Killed a Billion Birds Arthur G. Sharp,2024-02-07 During the late 1800s and early 1900s it was common practice for milliners to decorate women s hats with birds feathers and plumes and sometimes with the birds themselves As many as 300 million birds per year were killed for this fashionable enterprise causing the extinction of some entire species and the endangerment of others Lawmakers and bird aficionados were slow to react to the effects of this practice which went on almost unabated for a quarter of a century Then noted naturalists like George Bird

Grinnell William T Hornaday and President Theodore Roosevelt who recognized the economic benefits birds provided banded together to pass meaningful legislation to protect them and to curb the production of murderous millinery This book explores the troubled history of millinery and its complicated relationship to birds and conservation It explores why it took so long for the slaughter to end and how the efforts of individuals and groups brought about change [Isles of Refuge](#) Mark J. Rauzon,2000-11-01 In [Isles of Refuge](#) the first book solely devoted to the Northwestern Hawaiian Islands field biologist Mark Rauzon shares his extensive first hand knowledge of their natural history while providing an engaging narrative of his travels Braving seasickness bad weather and biting bird ticks he journeyed from Nihoa to Kure to study and photograph plants and animals for the U S Fish and Wildlife Service rare palms sharks turtles seals and thousands of birds finches terns petrels noddies shearwaters curlews boobies tropicbirds ducks and albatrosses or gooneys famed throughout the Pacific for their flying prowess and bizarre breeding rituals Isolation and access restrictions have led to the recovery of many of the Northwestern Hawaiian Islands animal and plant populations to pre exploitation levels but they have also resulted in the general public s ignorance of the islands and their ecosystems Informative and enjoyable [Isles of Refuge](#) invites readers to learn more about the history and natural wonders of this invaluable resource [All about Hawaii](#) ,1921 [The American Philatelist](#) ,2009 [Hawaiian Almanac and Annual](#) ,1923 **[Hawaiian Almanac and Annual for ...](#)** ,1921 [Edwardian Ladies' Hat Fashions](#) Peter Kimpton,2017-04-19 Based upon the authors large personal collection of beautiful fashion postcards from Edwardian times this book takes the reader on a journey through that era covering the hat fashions and social changes of the day Delve further into the carnage that took place around the world in which unscrupulous and money grabbing individuals from the Northumbrian coast in England to the Everglades in America would callously slaughter whole colonies of birds leaving their young to die purely to provide the millinery trade with ornate feathers to decorate fashionable hats during that era The book also takes the reader into the world of millinery sweatshops of poverty stricken New York and describes the conditions and deprivations under which the poorly paid workers many of them immigrants worked You can even learn about the background history and amazing life of one of the worlds greatest fashion designers Coco Chanel as she set out on her lifetime of fashion in Edwardian Paris With superb fashion colour plates of the day together with images of amazingly creative and colourful hat pins from both the UK and America the author shares the fruits of his 40 years of postcard collecting and the highs and lows of his search for the Hats postcards as worn by his Edwardian girlfriends from over 100 year ago [Islands in a Far Sea](#) John L. Culliney,2005-11-30 First published in 1988 [Islands in a Far Sea](#) offers a comprehensive environmental history of Hawai i This thoroughly revised edition begins with an up to date account of the geological formation and shaping of the Islands their colonization by plants and animals and the patterns of ecology and evolution that unfolded in nurturing seas and on breath taking landscapes This book tells the story of human interaction with Hawai i s native landscapes and rich biological heritage The author s accessible language allows readers to grasp basic

geological and biological principles and to understand the perhaps surprising vulnerability of Hawaiian ecosystems which have coevolved with volcanoes to human impact Islands in a Far Sea includes many well documented historical examples of such impacts featuring growth and greed fears and foibles as humans confronted endemic nature in Hawai i Citing a large array of sources the author makes it possible for interested readers to probe more deeply the changes in natural systems that have ensued on all of the Hawaiian Islands To date the result has been the tragic reduction of a unique and benign biota However the book holds out hope that current efforts to protect what is left of Hawai i s flora and fauna in their remaining wild settings may yet succeed *Paradise of the Pacific* ,1923 **Environmental Biology** Terry Hilleman,2009-01-03 Environmental biology is a study in the conditions of life these conditions impact the life within it The conditions of life are not limited to the present time environmental biology has applications to any time in the history or future of any place on earth or beyond The environment sets limits on the life within it The loss of habitat is the loss of the conditions of life that is loss of habitat is really loss of the conditions of existence necessary for the life within The loss of habitat is the primary cause of extinction This book clearly identifies why habitat destruction is the primary cause of extinction not only for today but for all time It establishes that the degree of habitat destruction is directly proportional to the degree of past extinction event severity Habitat destruction creates changing isolated environments which seem to be a component of both destructive and creative evolutionary change **Eye of the Albatross** Carl Safina,2003-04 Interwoven with recollections of whalers and famous explorers Eye of the Albatross probes the unmistakable environmental impact of the encounters between man and marine life Safina s portrait results in an eye opening look at the health of our oceans 15 illustrations 13 maps *Thrum's Hawaiian Annual Combined with All about Hawaii* ,1940 **Index to the Honolulu Advertiser and Honolulu Star-bulletin** Hawaii State Library,1968 **Hawaiian Tourfax Annual** Hawaii Tourist Bureau,1937 *Hawaii Farm & Home* ,1940
