Capitalist World Development Stuart Corbridge, 1986 Corbridge provides a fascinating review of the conflict of interest between metropolitan capitalism and the development of the periphery of the modern world system

Key Texts in Human Geography Phil Hubbard, Rob Kitchin, Gill Valentine, 2008-05-19 A book that will delight students *Key Texts in Human Geography* is a primer of 26 interpretive essays designed to open up the subject's landmark monographs of the past 50 years to critical interpretation The essays are uniformly excellent and the enthusiasm of the authors for the project shines through It will find itself at the top of a thousand module handouts THE Textbook Guide Will surely become a key text itself Read any chapter and you will want to compare it with another Before you realize an afternoon is gone and then you are tracking down the originals Professor James Sidaway University of Plymouth An essential synopsis of essential readings that every human geographer must read It is highly recommended for those just embarking on their careers as well as those who need a reminder of how and why geography moved from the margins of social thought to its very core Barney Warf Florida State University Undergraduate geography students are often directed to key texts in the literature but find them difficult to read because of their language and argument As a result they fail to get to grips with the subject matter and gravitate towards course textbooks instead Key

Texts in Human Geography serves as a primer and companion to the key texts in human geography published over the past 40 years. It is not a reader but a volume of 26 interpretive essays highlighting the significance of the text, how the book should be read, reactions and controversies surrounding the book, the book's long term legacy. It is an essential reference guide for all students of human geography and provides an invaluable interpretive tool in answering questions about human geography and what constitutes geographical knowledge.

The Global Economic System I. Wallace, 2002-09-26. Provides a unique treatment of world economic geography as a whole and examines the principle philosophies that have shaped our study of it. It identifies the importance of the biophysical as well as cultural and political environments.

Economic Problems of Modern India Gurmukh Ram Madan, 1989. *The Geography of Underdevelopment* Dean Forbes, 2010-11-26. First published in 1984, this title discusses the emergence of both the orthodox and political economy based approaches to underdevelopment in geography, critically assessing their strengths and weaknesses and showing the relationship between intellectual developments and changing material conditions. The work is primarily concerned with theories though it does contain much empirical material drawn from throughout the Third World. The book examines the emergence of theories of development historically and considers the various contemporary theoretical schools, both Marxist and non-Marxist. It goes on to consider four aspects of development which are of particular interest to geographers, namely the world economy, regional imbalances, the human nature theme and the analysis of urban space, and concludes by suggesting some directions for future research.

Gender Equality and Economic Development K.P. Yadav, 2006. Highlights the struggle for gender equality led mostly by women but by a growing number of men. Considers issues of human progress in the areas of social, economic and political life. Appends a short version of the recommendations of the National Perspective Plan for Women and the 1974 report of the Committee on the Status of Women in India.

Perspectives on the Third World Development P. R. Sharma, 1991.

Environmental Management and Development Christopher J. Barrow, 2005. The environment and its management has been and continues to be a very topical issue. Existing environment and development texts place emphasis on listing problems, making warnings and voicing advocacy but by focusing on environmental management, this informative book offers a very different perspective. Moving on from the usual much-discussed viewpoints, Barrow looks towards practical management and problem-solving techniques. He clarifies the definition, nature and role of environmental management in development and developing countries, beginning with an introduction to the key terms, issues and tools of environmental management which are linked and developed in later chapters and concluding by discussing who pays for environmental management and its future in developing countries. Written by an experienced and well-known author, this clear, user-friendly book is ideal for students of resource management, geography and development studies. It makes excellent use of chapter summaries, boxed case studies, annotated further readings and websites, discussion questions and illustrations.

International Commodity Control Fiona Gordon-Ashworth, 2024-02-01. Originally published in 1984 at a time when

international commodity control was brought from the periphery to the centre of international trade policy this book provided a new and more comprehensive approach to and an analytical appraisal of international commodity controls from their origins in the 1920s to their widespread acceptance as an important element in international trade policy in the 1970s The first part establishes the economic and institutional background against which controls were introduced and includes sections on a wide range of issues such as the changing structure of world commodity trade and the roles of GATT UNCTAD and the former EEC Part 2 considers the principal control mechanisms which have been used at the international level and review the national counterparts and alternatives Part 3 assesses on a commodity by commodity basis how the control worked in practice It covers all the international commodity agreements to 1982 and also considers examples of raw material cartels

The European Miracle E. L. Jones, 1987-08-31 Why did modern states and economies develop first in the peripheral and late coming culture of Europe This historical puzzle looms behind every study of industrialization and economic development In his analytical and comparative work Eric Jones sees the economic condition forming where natural environments and political systems meet Europe s economic rise is explained as a favoured interaction between them contrasting with the frustrating pattern of their interplay in the Ottoman empire India and China For the second edition Professor Jones has added a new introduction and an updated bibliographical guide

The Myth of Continents Martin W. Lewis, Kären Wigen, 1997-08-11 In a thoughtful and engaging critique geographer Martin W Lewis and historian Karen Wigen re examine the basic geographical divisions we take for granted Their up to the minute study reflects both on the global scale and its relation to the specific continents of Europe Asia and Africa actually part of one contiguous landmass Photos maps

Geography And Development Arthur Morris, 2005-08-15 First published in 1998 Written in a highly accessible style this book examines economic development processes across the world The old certainties of what constitutes development and whether it is the same for all peoples no longer exist Goals once imposed by agencies like the World Bank are increasingly questioned and the spatial development planning characteristics of the 1960s and 70s is increasingly seen as an intrusion into free and competitive markets Indeed a question now being asked is should development be promoted at all This book examines these fundamental issues and presents and evaluates the different theoretical approaches to development Each country has its own tale to tell and by using valuable case study material the author shows how different policies have impacted on the geography of regions Processes of development in the newly industrialised countries NICS of South Korea and Singapore are examined as well as the flexible specialisation model characteristic of many Mediterranean countries and the post industrial service economies based on high technology The book argues convincingly that the fundamental spatial and temporal patterns of development in modern times are no longer the importance of physical resources but the complex human resources and the determination to work Anchored firmly in the needs of students this book will be widely welcomed by undergraduates taking courses in human geography and development studies

Environmental Resources A.S.

Mather, K. Chapman, 2018-10-08 Environmental Resources provides a comprehensive text for undergraduate resource management courses. It begins with an introduction to natural and environmental resources and then considers them in the context of politics, time and space.

Developing The Environment C J Barrow, 2014-09-19 This book presents a comprehensive overview of global environmental problems past, present and future, examining their roots and implications and suggesting where possible ways in which they might be mitigated or avoided by careful management.

Dynamics of Regional Growth in Europe Andres Rodriguez-Pose, 1998-11-19 In a period of deep economic, social and political transformation, regional disparities seem to be particularly resistant to change. The emergence of a global economy, the shift in production methods and the greater mobility of capital, labour and raw materials have not brought about a radical reshuffling of the prevailing regional disparities. There is a greater concentration of economic activity in core areas and very few peripheral regions are taking advantage of the process of global restructuring. The Dynamics of Regional Growth in Europe looks for the reasons behind this persistence in the social, political and institutional arrangements of a large set of European regions by trying to relate two scientific approaches concerned with regional economic performance which share very little in common: the literature on socio-economic restructuring and structural change and neoclassical and endogenous growth theories.

Growth against Democracy H. L. T. Quan, 2012-08-20 Growth against Democracy: Savage Developmentalism in the Modern World by H. L. T. Quan is a compelling interrogation of the ways in which we have thought about modernity, capitalism and democracy and how those ideas inform neoliberal economics, diplomacy and impact human life. To explicate contemporary theories of development, Quan introduces the concept of savage developmentalism with its attendant distortions of the ideals of equality and freedom and assumptions that foment antidemocratic social and political forms. By outlining the pitfalls of security-obsessed developmental approaches, Growth against Democracy troubles the simple notion that modernity is inherently superior and development will benefit everyone. It shows how capitalists' needs for market finance and profitability often lead to development programs that engender expansionism, dispossession and repression. Drawing on political theory, international political economy, critical ethnic studies, legal studies and feminist analytics, this groundbreaking study exemplifies how multi-disciplinary scholarship best addresses the increasingly complex and multi-layered issues facing humanity today. It analyzes the linkages between development and national security and provides sustained attention to the making of foreign policy, the development of capitalism and corporate globalization. The book highlights three critical examples of where savage developmentalism has eventuated worse living conditions: severe social repression and displacement in Brazil, Japanese economic relations in Brazil,

under military rule 1964 1985 China's aggressive courting of African good will and resources and the United States reconstruction of Iraq These three major historical cases represent some of the most momentous global development in the last sixty years and never before have such powerful cases been analyzed in the same monograph Growth against Democracy helps re-evaluate the promises of progress security and freedom and broadens our ideas about and priorities for humane public policy at the national and global levels

Transcending the Culture-Nature Divide in Cultural Heritage Sally Brockwell, Sue O'Connor, Denis Byrne, 2013-12-13 While considerable research and on ground project work focuses on the interface between Indigenous local people and nature conservation in the Asia Pacific region the interface between these people and cultural heritage conservation has not received the same attention This collection brings together papers on the current mechanisms in place in the region to conserve cultural heritage values It will provide an overview of the extent to which local communities have been engaged in assessing the significance of this heritage and conserving it It will address the extent to which management regimes have variously allowed facilitated or obstructed continuing cultural engagement with heritage places and landscapes and discuss the problems agencies experience with protection and management of cultural heritage places

Globalization, Regional Development and Local Response Leendert Andrew de Bell, 2005 In a world that has become increasingly interconnected over the past decades economically politically socially and culturally new challenges are posed to development Since the 1980s development has increasingly become interpreted in terms of increasing integration into the world economy Export oriented manufacturing became widely viewed as the surest recipe for realizing economic growth while reducing income inequality and the role of foreign direct investments became increasingly important in development strategies worldwide However not every region industry and social group managed to become successfully integrated into the world economy In order to explain why these processes of economic restructuring have had such a differential impact this study situates developments within a wider historical social and political context to establish how these processes of globalization are mediated at the regional and local level The main object of study concerns the drastic socioeconomic transformation that has taken place in the state of Coahuila situated in the northeast of Mexico bordering the United States over the past three decades In particular since the start of NAFTA in 1994 Coahuila has become one of Mexico's most successful export oriented manufacturing states most importantly as a result of the large number of foreign direct investments it received However the effects of these developments have been unevenly distributed among its sub regions while questions must also be raised about its ability to contribute to sustained long term growth with equity The key issue appears to be not whether but how regions and localities become linked to the world economy page 4 of cover
