## **Monarchy As Democracy Gilbert George:**

*Gilbert & George*, 1991      *Ghost Empire* Philip Marchand, 2009-02-24 History travelogue and memoir combine in this illuminating journey in the footsteps of the great explorer La Salle This is the extraordinary account of a personal and historical quest in which Philip Marchand retraces the seventeenth century explorations of La Salle while he searches in the present day for vestiges of France's lost North American legacy After he explored the Great Lakes and the entire Mississippi La Salle was murdered by his own men when he led them on a disastrous mission to Texas The vast land beyond Quebec that he claimed for France could have become but for a few twists of history an alternative North America a French speaking Catholic empire in which native peoples would have played a prominent role Marchand probes the intriguingly flawed character of La Salle and recounts the astonishing history of the Jesuit missionaries coureurs de bois fur traders and soldiers who followed on his heels and of the Indian nations with whom they came into contact He also reports on the survivals of this diaspora from late night bars battle reenactments parish churches and wayside restaurants from Montreal to Venice Louisiana And throughout he draws on memories of his own Catholic childhood in Massachusetts to interpret the lingering attitudes fears hopes and iconography of a people who more deeply than most feel the burdens and the ironies of history

*Democracy The God That Failed* Hans-Hermann Hoppe, 2011-12-31 The core of this book is a systematic treatment of the historic transformation of the West from monarchy to democracy Revisionist in nature it reaches the conclusion that monarchy is a lesser evil than democracy but outlines deficiencies in both Its methodology is axiomatic deductive allowing the writer to derive economic and sociological theorems and then apply them to interpret historical events A compelling chapter on time preference describes the progress of civilization as lowering time preferences as capital structure is built and explains how the interaction between people can lower time all around with interesting parallels to the Ricardian Law of Association By focusing on this transformation the author is able to interpret many historical phenomena such as rising levels of crime degeneration of standards of conduct and morality and the growth of the mega state In underscoring the deficiencies of both monarchy and democracy the author demonstrates how these systems are both inferior to a natural order based on private property Hoppe deconstructs the classical liberal belief in the possibility of limited government and calls for an alignment of conservatism and libertarianism as natural allies with common goals He defends the proper role of the production of defense as undertaken by insurance companies on a free market and describes the emergence of private law among competing insurers Having established a natural order as superior on utilitarian grounds the author goes on to assess the prospects for achieving a natural order Informed by his analysis of the deficiencies of social democracy and armed with the social theory of legitimation he foresees secession as the likely future of the US and Europe resulting in a multitude of region and city states This book complements the author's previous work defending the ethics of private property and natural order *Democracy The God that Failed* will be of interest to scholars and students of history political economy and political
