Money And Debt A Solution To The Global Crisis:

Money and Debt Thomas H. Greco, 1989 **The People's Money** Adrian Kuzminski, 2023-12-06

The People's Money: The Case for Public Banking in the United States offers a broad account and analysis of the most radical policy proposal of the populist movement: a new monetary currency issued by a public banking system. Nineteenth century American populists proposed a radical theory of sovereign money creation through public banking. Money would be issued as loans based on collateral to individuals at local public banks much as it is created by private banks in the existing banking system. Public banking however would operate as a non profit community service. Usurious rates would be replaced by 1% fixed interest corresponding to the natural rate of resource depreciation over a lifetime. The populist idea of a natural rate of interest represents an intriguing confluence of ecological and monetary thinking. The populists argued that democracy requires economic security that only property ownership can provide. In shifting the benefits of credit from lenders to borrowers they aimed to promote widespread ownership of property. They opposed all monopolies of property especially those of private finance. Unlike socialists who favored collective control over production populists sought to reform capitalism by widely distributing credit among individuals. With exorbitant rates of interest eliminated borrowers would be freed of the servitude to creditors demanded by excessive interest rates. They would retain perhaps for the first time in history the full benefit of their loans for themselves and their families.

Beyond the Matrix Patricia Cori, 2010-08-31

Those concerned with the current eco crisis most often look only to scientists and politicians for solutions. In this important book Patricia Cori invites another overlooked group perhaps the most important one to join the discussion. Beyond the Matrix collects some of the most provocative forward thinking interviews conducted on Cori's radio show of the same name bringing together leaders in various fields of alternative thinking to propose new and exciting perspectives on the future of humanity as we approach the potentially life changing 2012. Beyond the Matrix offers a portrait of a refreshingly optimistic future in a time when we are bombarded with an apocalypse scenario as the future of our civilization. The book features no holds barred in depth interviews with such renowned thinkers as New York Times best selling author and theoretical physicist Michio Kaku whom many call the Einstein of our times, respected UFO and ET investigator Stanton Friedman, radical Egyptologist Stephen Mehler, former astronaut and the sixth man on the moon Dr Edgar Mitchell, crop circle expert Andy Thomas, intuitive physicist MaAnna Stephensen, Paradigm Research Group director, Stephen Bassett, founder of bluevoice.org, Hardy Jones and nine others. The probing conversations cover a bracing range of subjects from string theory, UFO and extraterrestrial life, crop circles and ecology to healing, Egyptian mysticism, ascension and other significant topics that swirl in our minds as we face a new paradigm for human exploration where spirit and science finally merge. With its blend of fascinating dialogue and higher

ideals Beyond the Matrix offers both hope and reassurance in these challenging times **Ethical Transformations for a Sustainable Future** Deva Temple,2017-09-29 It has become increasingly apparent that humanity's complex social political and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes If the planet is to continue to be habitable for the myriad web of other creatures that make life possible humans must transform their systems so that they are aligned with natural systems One thing is sure it will not be Nature's laws the delicate interdependence that characterizes Earth's ecosystems that change The change must begin within each person and from there permeate throughout our social political and economic structures The contributors to this volume believe that such transformations are urgently needed and possible and they offer specific examples They suggest solutions that call for new perspectives in our ethics beliefs traditions economy business gender relations education and technology They show that human beings have the power to implement changes in all natural and social environments The chapters in this book have been organized around three keywords Reconnecting Reframing and Rethinking The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long We need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development and we need to rethink the mission of education and the roles of technology **World's Money** Michael Moffitt,1984-06-22 From Simon Schuster The World's Money is Michael Moffitt's exploration to international banking from Bretton Woods to the brink of insolvency For any reader looking to understand our banking system and its many failings The World's Money is a must read and despite its publication date its principles remain as relevant today as they did 30 years ago **People Money** Margrit Kennedy,2012-07-05 A comprehensive guide to the principles and practice of regional currencies It shows how regional currencies can transform the lives and well being of local communities how they can sustain businesses how local authorities can participate in their success and consequently why supporting regional currencies is of vital importance to the future of your community region or country **The New Business of Business** Willis W.
