Animated Encounters Daisy Yan Du, 2019-02-28 China s role in the history of world animation has been trivialized or largely forgotten In *Animated Encounters* Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period the 1940s 1970s She introduces readers to transnational movements in early Chinese animation tracing the involvement of Japanese Soviet American Taiwanese and China s ethnic minorities at socio historical or representational levels in animated filmmaking in China Du argues that Chinese animation was international almost from its inception and that such border crossing exchanges helped make it Chinese and subsequently transform the history of world animation She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of Chineseness and further questions the long held belief that the forty year period in question was a time of cultural isolationism for China due to constant wars and revolutions China s socialist era known for the pervasiveness of its political propaganda and suppression of the arts unexpectedly witnessed a golden age of animation Socialist collectivism reinforced by totalitarian politics and centralized state control allowed Chinese animation to prosper and flourish artistically In addition the double marginality of animation a minor art form for children coupled with its disarming qualities and intrinsic malleability and mobility granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship both at home and abroad A captivating and enlightening history *Animated Encounters* will attract scholars and students of world film and animation studies children s culture and modern Chinese history

China Colin Mackerras, 2022-05-17 The overthrow of the gang of four in 1976 had profound effects in all areas of Chinese society and probably nowhere can this be seen more clearly than in the performing arts Jiang Qing Mao Zedong's widow was strongly interested in the performing arts and exercised great influence over them Professor Mackerras describes this influence and the effects its removal had on the arts in the years after Mao's death as well as in the years following the Cultural Revolution This book first published in 1981 deals not only with opera the spoken play music and dance but also with cinema describing how in all these cases the Chinese have adapted traditional art forms for political social and propagandist purposes both domestic and international It charts the transformations that have taken place in all the multiple aspects of the performing arts and sets them against the development of Chinese society as a whole It also looks at the role of the actor and performer in society including their training social status and livelihood *Translation as Actor-Networking* Wenyan Luo, 2020-02-07 This book employs actor network theory ANT to explore the making of the English translation of a work of Chinese canonical fiction Journey to the West demonstrating how ANT as applied to Translation Studies can contribute to a richer understanding of the translation process The volume builds on previous research to apply ANT theory to translation studies by looking in depth at a single work highlighting the unique factors underpinning the making of

Monkey Arthur Waley's English translation of the Chinese classic *Journey to the West* which make the work an ideal candidate for showing ANT theory in practice in translation Luo uses an in depth exploration of the work to examine the ways in which both human and nonhuman translation actors and agents interact in different ways in the publication of this translation showcasing them as dynamic changing and active participants whose roles shifted over the course of the translation process rather than as fixed entities as traditionally categorized in existing research The book moves beyond a descriptive account of an ANT based case study toward offering a systematic theoretical and methodological framework of ANT based translation studies using the conclusions drawn from its application to a single work to suggest a way forward for applying ANT in translation production on a wider scale This book will be of interest to scholars in translation studies sociology and comparative literature particularly those interested in actor network theory or network studies and their application to related disciplinary fields
