Mehta, 2012 This edited volume identifies the various country specific factors that warrant changes in the design and implementation of competition laws The book covers case studies of nine countries of differing sizes and at varying stages of economic development that have at one stage or another repealed extant competition laws for new ones and seeks to examine the motivations and contexts under which this was done The countries examined include the Czech Republic Hungary India Ireland Poland Serbia South Africa Tanzania and the UK Tracing the evolution of competition regimes in the countries covered the book provides lessons for countries still in the process of forming their competition regimes The contributions show that the road to strong competition regimes is seldom smooth and that social economic and political factors in the country hugely impact on the pace and effectiveness of competition reforms The volume also addresses the issue of when the development of competition policies and laws can be seen to be in conflict with national development strategies **Monopoly and Competition and Their Regulation** International Economic Association, 1954

Competition and Entrepreneurship Israel M. Kirzner, 2015-07-10 Stressing verbal logic rather than mathematics Israel M Kirzner provides at once a thorough critique of contemporary price theory an essay on the theory of entrepreneurship and an essay on the theory of competition Competition and Entrepreneurship offers a new appraisal of quality competition of selling effort and of the fundamental weaknesses of contemporary welfare economics Kirzner s book establishes a theory of the market and the price system which differs from orthodox price theory He sees orthodox price theory as explaining the configuration of prices and quantities that satisfied the conditions for equilibrium Mr Kirzner argues that it is more useful to look to price theory to help understand how the decisions of individual participants in the market interact to generate the market forces which compel changes in prices outputs and methods of production and in the allocation of resources Although Competition and Entrepreneurship is primarily concerned with the operation of the market economy Kirzner s insights can be applied to crucial aspects of centrally planned economic systems as well In the analysis of these processes Kirzner clearly shows that the rediscovery of the entrepreneur must emerge as a step of major importance
